

Dr. Hill Will Address Grads In WT Closing

DR. J. A. HILL

More than 200 students will be graduated in summer commencement exercises Friday at 8 p. m. at West Texas State College. The outdoor ceremonies will be held in Buffalo Stadium. A total of 218 are candidates for degrees.

Dr. J. A. Hill, President Emeritus, who for 30 years headed this institution, will make the commencement address. An academic procession of faculty and graduates will gather at the stadium about 7:30 p. m., with the program due to begin at 8. President James P. Cornette will confer degrees.

A reception, given by Dr. and Mrs. Cornette, will honor graduates tonight at 8 p. m. in WT's new library building. The receiving line will include Dr. and Mrs. Cornette and representatives of faculty and students.

Invocation at commencement will be given by the Rev. Jim T. Pickens, instructor in Bible, Methodist Church. Dr. Walter Juniper, dean of the college, and Dr. James Russell, graduate dean, will present the candidates. Singing of Alma Mater, closing the program, will be led by Dr. Houston Bright, music department head.

Of the 218 candidates, 131 are seeking the Master of Education degree, 16 the Master of Arts, and 2 the Master of Business Administration. Six are candidates for the Bachelor of Arts, 59 the Bachelor of Science, 3 the Bachelor of Business Administration, and 1 the Bachelor of Music Education.

Candidates for degrees from Canyon are: George T. Schmitz, Master of Business Administration; Letha Ferne Harwood and Obie L. Sims, Jr., Bachelor of Arts; Herman W. Demus, Margaret Hand, Clifford Daniel Johnson, and Richard L. Osborne, Master of Arts; Austell Burrus, Miriam Osborn Caperton, Cora Eugenia Hill Cavitt, Wanda Jean Edwards, Gene Garrison, Mary Elma Moreman, Willie Avery Osborn, Cecil E. Parkhill, Beryl Ellen Richardson, and Faye Kenney Wooldridge, Bachelor of Science.

And Lou L. Cannan, Ray E. Clay, Betty Jo Cone, John Douglas Dameron, Cortez Shepherd Dowlen, Margaret D. Doyle, Glenn C. Fitzgerald, Perry Irving Keyser, W. C. Osborn, Alma Allmon Perkins, Eutha Eastwood Russell, and Alta M. Smith, Master of Education.

South Amarillo House Burglars Keep Law Busy

A series of house burglaries kept Sheriff M. E. Cantrell and his deputies busy early this week. There were four of the burglaries that consisted of houses being broken into and robbed. "All of them were in a radius of three or four miles," Cantrell said, "and they were located in the northeast part of the county."

In the report it was stated that the robberies all looked very much alike. In fact, it was stated that they appeared to be the work of the same person or persons. From the appearance of the jobs it seemed that those who committed them merely made a circle and robbed all of the houses they came to.

Items stolen included such articles as wrenches of all kinds and types, about six pair of boots. The boots were described as being those belonging to men, women and children. There was wearing apparel for both men and women stolen and various other articles. In addition to this several guns were taken.

Sheriff M. E. Cantrell and Kelly Rogers of the Texas Rangers have been working day and night in an attempt to break the case early. At the time the report was made they had some good leads but no arrest had been made at that time.

Cantrell pointed out that such incidents were going on all over the western Panhandle country. For this reason he has asked that the public notify his office in the event that a suspicious person is noted. If the suspicious person or persons are in a car, be sure to get the license number.

H. D. Curtis and Glenn Gardner of Amarillo spent last week in Colorado fishing.

Randall County Donates 1½ Cars Wheat to CROP

The people of Randall County made a worthy contribution to the Christian Rural Overseas Program when the wheat from the Panhandle area was dedicated at Amarillo on August 14. A car of wheat, 1,680 bushels, donated by Randall County people was dedicated with wheat from other sections.

In addition to this wheat enough money, \$1,435.86, was sent to the P. G. C. Elevators in Amarillo to purchase additional wheat to help fill another car. This much money will buy about 700 bushels. So, the total wheat for CROP from Randall County will be about 2,385 bushels or 1½ cars.

Every two bushels of wheat sent overseas will furnish bread for some starving person. At this rate during one year's time approximately 1200 people who were on the verge of starvation will have been fed by Randall County people.

All the wheat gathered will reach needy people. CROP is sponsored by the churches and distributed overseas by church workers. The transportation to ports for shipping is furnished by the railroads and ships to carry the products overseas are furnished by the United States. Governmental agencies do not control of any part of CROP. So far Texans have contributed products valued at \$50,000. Before the year is out this amount will be greatly increased. Texas leads the nation at the present time in the value of products given for CROP.

Births

A daughter was born to Mr. and Mrs. Harold Bunch on August 13. Mr. and Mrs. Arnold Johnson are the parents of a son, born August 18.

Born to Mr. and Mrs. Albert Vigne, a daughter on August 18. A son was born to Mr. and Mrs. Kenneth Patton on August 19.

Born to Mr. and Mrs. Wayne Bagley, a son on August 20.

Mr. and Mrs. Jeff Wallace spent last Friday evening visiting in the home of Mr. and Mrs. E. A. Michael.

Mrs. Harley L. Stone and sons spent Monday and Tuesday nights in the home of her parents, Mr. and Mrs. Guy B. Tabor.

Mr. and Mrs. Dempsey Alexander spent the week end in Kress and Plainview visiting relatives and friends.

Miss Alice Brotherton of Gruver spent last week visiting with Nancy Root and Sandra Michael.

Mr. and Mrs. Lee Chandler were guests in the parental W. H. McAtee home Sunday.

Mr. and Mrs. Garland Cavitt spent the week end in Portales, New Mexico.

Mr. and Mrs. H. C. Adcock and daughter, Nancy, spent last week in Colorado on vacation.

Mr. and Mrs. W. S. Terry and son of Borger spent Sunday in the home of Mr. and Mrs. J. D. Pruitt.

Mrs. Cal Lovelace spent the week end in McCamary visiting her parents, Mr. and Mrs. Beeler Brown.

Mr. and Mrs. Lonnie Byars have returned after having spent a vacation sight-seeing in Colorado.

Mrs. Sallie Burgess of Lubbock is visiting her son, Sidney Burgess, and family.

Mrs. Billy McDowell is a recent addition to the office force at Thompson Hardware Company.

Kipling wrote both a happy and a tragic ending to his story, "The Light That Failed."

Leonardo da Vinci, the painter, was also a sculptor, architect, engineer, philosopher and physicist.

Election Party Will Be Held At News Office

Following the custom of 42 years, The Canyon News will hold a primary election party Saturday night.

All election judges have been notified to telephone or bring their returns to The Canyon News office as soon as the vote is complete in their boxes. Due to the short ballot the returns should be completed early Saturday night.

The returns will be posted in the east window of The News building and citizens are invited to come by and see the returns.

Transfers Are Announced By SPS Company

CLIFF MLINAR

Cliff Mlinar, Southwestern Public Service Company Manager here, will be transferred to Amarillo as of September 1. Mr. Mlinar has been with the company for about seven years and he has been in Canyon almost three years.

During the time he has been in Canyon Mlinar has been active in civic duties. He is a member of the Canyon Rotary Club; chairman of the industrial committee of the Canyon Chamber of Commerce, and is active in many organizational projects.

The man who is taking Mlinar's place is Truett Hull who is being transferred down from Amarillo. Mr. Hull went to work with the Southwestern Public Service Company after finishing school at the University of Texas. He has been with the company almost four years. His work has consisted mostly of work with personnel and safety measures.

Mr. Hull, who was in the Navy three years, is married and has two sons. One is two years old and the other about three months. It was also made public that Gordon Lyons was transferred from Amarillo to Pampa. Lyons was manager of the Southwestern Public Service Company here before Cliff Mlinar came.

Other men who are being transferred out of the office here in Canyon are R. E. Boyce, Bill Abbott and Joe Gidden.

Attendance Record At Palo Duro State Park Broken Sunday

The calendar year attendance record at Palo Duro Canyon State Park was broken Sunday morning when Mrs. W. J. Lambright of Pampa passed through the gates. Mrs. Lambright was number 113,780 to pay attendance at the park in 1952. The previous high was 113,779 set in 1952.

Every person that pays admission to the park from now until December 31 will have the honor of being a record breaker. John L. McCarty, park manager, estimates that attendance at the world's most colorful Canyon this year will exceed 150,000 persons.

Installation of a large number of additional concrete picnic tables, benches and steak grills this fall is expected to increase the autumn and winter attendance.

MARRIAGE LICENSES

Max Bellah to Lula Charlotte Arant, August 11.

Mr. and Mrs. Monroe Henson of East Vaughn, N. M.; spent Sunday night in the home of Mr. and Mrs. Raymond Doss.

Mr. and Mrs. Glenn Waggoner and children spent the week end in Spearman visiting friends.

Mrs. Florence Stephenson spent the week end in Hereford visiting with friends and relatives.

Wheat Seed for New Crop Need Be Selected Now

Each year about this time wheat farmers must decide what variety of wheat seed to plant. Wheat seeding time is almost here with moisture conditions mostly unfavorable. "When moisture comes, a large average of wheat is likely to be seeded," says John Brazzil, county agent.

Of the many varieties of wheat on the market there are five that meet most of the requirements of yield, baling quality, some disease resistive and harvesting and testing weight standards. Two early maturing varieties are gaining favor. These two are Wichita and early Triumph.

The three other recommended varieties of wheat listed in the order of their importance are Westar, Comanche and Tennar.

In recent years the average seeded to inferior wheats such as Chiefton, Red Chief, and early Blackhull have grown smaller each year. Three years ago two new varieties, Blue Jacket and Red Jacket were introduced and have been grown. At the present time there is no place in the winter wheat area where the last two varieties are recommended. Recommendations as mentioned here means the agricultural experiment stations.

Randall County this year has one grower licensed by the State Department of Agriculture to grow certified seed. He is Chas. W. Conatser, son of Charley Conatser. Young Charles, a 4-H Club member, produced 800 bushels of certified Wichita.

He has for sale 400 bushels that will be bagged and tagged with the official blue tag showing variety, germination, purity and weed seeds.

John Brazzil has a list of all growers of certified seed of small grains in Texas for 1952. Sources of registered seed can also be had for those who may be interested in becoming a certified seed grower. Randall County wheat growers must depend on other counties to furnish most of the certified planting seed.

When a grower has decided on the variety to plant he should be sure that all planting seed is treated with an approved seed disinfectant such as compounds of mercury or copper.

Building Boom Shown by Map At City Hall

If you want to see how rapidly the city is growing visit the City Hall and have a look at the map in the conference room. Different colored pins are placed in the map to designate the different types of buildings that have been constructed. The pins represent the building program since January 1, 1951.

There are three colors of pins in the map to represent the three different types of buildings. Some are additions, some are new homes while others are business buildings. The total since January 1, 1951, is in the vicinity of 165 buildings.

In some instances where several new homes were built in a location that had not been developed new streets had to be cut and graded. Although this building program has added a great deal to the town, it also created some new expenses. These expenses were in the form of new street work, water mains and sewer lines.

The buildings are sprawled from east to west throughout the entire 2½ sections which comprise the city limits. Boundaries from north to south is one section.

The new buildings show a surprising amount of built up areas within the city limits. You may get an idea about the amount of building that is going on by driving about town. You will have a more thorough understanding of it after taking a good look at the map in the City Hall.

Umbarger Boy Hurt In Car Accident On Highway 87

Billy Joe Woolsey of the Umbarger community was injured in a car wreck just south of Amarillo on Highway 87 Thursday night. He had several ribs fractured and his ankle was broken by the impact of the cars.

The three-lane highway between Canyon and Amarillo was reported to be responsible for the accident.

Mr. and Mrs. F. W. Longbine and daughter, Mary Rose, spent the week end in Claude visiting Mr. and Mrs. Fred Longbine.

McAtee-Warwick Now Approved to Give Inspection

The McAtee-Warwick Garage, 610 23rd Street, received official stickers and credentials as a state approved inspection station Thursday, August 14. Although the credentials and stickers only arrived last week the garage and its facilities had been approved for this work since July 26.

Since the stickers and credentials were obtained the personnel at the garage has inspected approximately 40 vehicles. At present these vehicles only require minor repairs, said one of the officials. This inspection station as well as the other three in town expect the vehicles to become more difficult to inspect as time runs out.

This is a logical attitude as was pointed out by a garageman. Those people who know that they are going to have to spend some money getting their car in condition to pass the inspection will delay the process as long as possible. As one man put it, "It's kind of like having a tooth pulled, you're going to delay the pain as long as possible."

The McAtee-Warwick garage has been in operation approximately four years. It is equipped with the latest and finest equipment to adequately take care of the state inspections. Any car can be properly inspected and given necessary adjustment by the trained personnel, said a spokesman for the garage Monday.

Five DWI Cases from Weekend Reported

Information received from Sheriff M. E. Cantrell's office and from the office of County Attorney Gene McGlosson, Jr., shows a total of five driving while intoxicated charges over the week end.

County Attorney McGlosson said two of the men were fined \$75 each and one was fined \$50. The other two who have been charged with DWI have not come in yet. Their cases were pending for a later date.

Other week end activities that kept law officials busy were the speeding automobiles on Highway 87, and another case of the traffic light being hit. This time the light was heavily damaged. The lens was knocked completely out of the caution signal facing west and the metal shielding about it was left barely hanging.

Coopers Win Most Gifts at PAG Picnic

The annual picnic of the Panhandle Association of Grocers was held in Thompson Park at Amarillo Sunday. A large crowd showed up for the picnic that was expected. A number of prizes was given away and from the looks of the winners it was a lucky day for the Coopers.

Neil Cooper from the store in Hereford won a deep freeze that was given away. Mrs. Clay Cooper won a refrigerator air conditioner. Charles Cooper won a radio and John Cooper from McLean won a basket of groceries.

When the Coopers stopped winning their employees got into the act. Billy Tate of Cooper's Market here won a basket of groceries.

Firemen Fund Being Raised

Bill Sternberg, chief of the Canyon Volunteer Fire Department, said Saturday that the department is gradually building up its fund. Although the department does not pay the firemen, there are certain expenses that cannot be bypassed and for this reason the fund is needed.

Each man in the fire department spends a great deal of his time practicing and learning fire fighting techniques. These men are also required to meet each week to keep up their knowledge of the latest fire fighting methods and equipment.

With the fund that is being raised by the department a lot of necessary items can be provided. For instance, helmets and coats for the firefighters could be supplied from the fund. After pointing this out Bill went on to add that there may be times when one of the firemen would become ill and need some financial assistance. The fund could be used in this case to help someone through difficult times.

Various functions are being sponsored from time to time by the firemen in order to keep this fund growing. One activity that the department is to sponsor in the near future is the Hagen Brothers Circus that is coming soon.

Second Primary on Saturday, Aug. 23

The run-off primary of 1952 will be held in Texas on Saturday of this week.

In spite of the frantic efforts to get out the vote for this primary, it is estimated that the number of votes will fall below the total vote which was cast in the July primary.

The race for Sheriff of Randall county should bring out a large vote in this county. The race is between Sheriff M. E. Cantrell, running for another term of office, and L. S. Johnston, who served as County Commissioner from Precinct No. 1, and is making another race against Mr. Cantrell.

Both of the candidates expressed confidence in the outcome of the race if the voters will only take time to go to the polls and make a selection. There are only two other races in this county: One state race and one District race.

The name of Martin Dies appears on the official ballot without an opponent in view of the fact that Dies received practically a majority of the July vote against six opponents.

Frank P. Culver of Tarrant county and Spurgeon Bell of Harris county are in the run-off for the Supreme Court, Place 1.

Joe S. Moss of Garza county and Ernest O. Northcutt of Potter county are running for Associate Justice of the Court of Civil Appeals.

By far the most important race so far as Randall county citizens are concerned is that for Sheriff, with the candidates as L. S. Johnston and M. E. Cantrell.

Voters are urged to go to the polls early Saturday morning. The following is a copy of the official ballot:

For Congressman-at-Large:
☐ Martin Dies, Angelina Co.
For Supreme Court, Place 1:
☐ Frank P. Culver, Tarrant Co.
☐ Spurgeon Bell, Harris Co.
For Associate Justice, Court of Civil Appeals, 7th District:
☐ Joe S. Moss of Garza Co.
☐ Ernest O. Northcutt, Potter Co.
For Sheriff:
☐ L. S. Johnston
☐ M. E. Cantrell

polls will open at 8 o'clock and close at 7 p. m.

Under the new provision of the law, the absentee ballots will be counted by a separate election board and reported separately instead of counted with the returns from each precinct.

Voters are urged to vote Saturday!

Brazzil Urges Prompt Action On Grasshoppers

Grasshoppers continue their work of destruction of the remaining green crops. As the blazing sun dries the pastures and ranges, the pests turn to greener fields if they can be found.

Recently the hoppers have been quite destructive in some parts of the county. They have moved in on gardens and young trees and have left stems where leaves should be.

Wheat farmers are watching these destroyers with anxious eyes. They know that when the rains come and the wheat is planted the young wheat will become a tasty morsel to the hungry horde.

Marshall Rockwell, Sr., is one farmer that received some consolation recently by watching some grasshoppers die. He had the ditches and grass patches around his farm sprayed and within a few hours could almost scoop the dead and dying hoppers from the ground. He believes that unless the farmers of Randall County carry on an extensive control program the damage to young wheat will be terrific.

According to John Brazzil, county agent, a spray program for grasshopper control should cover a wide area if it is to be successful. As the hoppers migrate they are able to lose many of their population and still destroy field crops and pasture grass.

In some of the Western states the problem is so severe that Government help has been used to control the hoppers. Some of the new insecticides give amazing results when large areas are covered.

One man working alone can make little headway in the fight to finish off the hoppers before wheat is planted. But many farmers and ranchers working together can cover areas large enough to give effective control.

Of the new insecticides Aldrin seems to be the one most used. Chlordane and toxophene are also effective. Spraying with either ground machines or airplane will get the hoppers. When wheat is sown and is growing the time to control hoppers has passed. It is too late then.

DR. MANUS FOSTER HERE
Dr. Manus Read Foster, who received his degree from the University of Kansas this spring, is visiting in the parental Dewey Foster home before reporting to work with the Magnolia Laboratories in Dallas.

Ford Foundation Fellowship Won By Mrs. Findley

Mrs. Nell Findley, high school teacher and wife of Joseph Findley, was selected for a Ford Foundation Fellowship and was making final preparations Saturday morning for her work in this capacity. This is the first year the fellowship has been opened to high school teachers in the United States were given scholarships through the Ford Foundation.

The Ford Foundation has been doing this sort of thing for college teachers for several years. This year the field was opened to high school teachers. A special committee selected 400 teachers for fellowships.

Mrs. Findley said Saturday morning that she would spend almost a year working at Temple University in Philadelphia, Pa. Her work there will consist of high school reading programs and visiting some of the outstanding schools in this field. Her work in this field will take her to such cities as San Francisco, Detroit, Houston and Austin. She also said that she would visit Boston to study American history.

After completing this work Mrs. Findley plans to go to Europe. Her most extensive study there will be in England. Here she will enrich her literature in history, literature and music.

Mrs. Findley taught English and biology in Canyon High School. She had been with the high school two years before being awarded the fellowship. After her one year of absence Mrs. Findley will return to the Canyon School System to continue her teaching career.

Mrs. Findley plans to leave next June for England where she will study during the summer. Her husband, Joseph Findley, professor in West Texas State, will accompany Mrs. Findley on the trip and will join her in the English colleges.

Authorities Are Fast in Catching Forgery Suspect

Sheriff M. E. Cantrell's department went into action last week when a forged check turned up at a local business. Less than 48 hours later a man was picked up in Elk City, Okla., and charged with the forgery.

The check was said to have been stolen from the C. Y. Masonry Company, contractors in Potter County. The company is owned and operated by Cecil R. Young.

About 100 of the checks were reported as having been stolen recently. Approximately 12 or 14 of the checks had turned up late last week. It was reported that more than \$1,000 worth of the checks had been cashed but only one had turned up in Canyon at that time.

The check that was cashed in Randall County was made out to Glen Gibson. It was check number 144 and the amount it was made out for was almost \$100.

When authorities learned that the subject was being held in Elk City, Okla., they dispatched two officers to go bring him back. Homer Ewton, Randall County deputy sheriff in South Amarillo, and Murphy Hurd, a Potter County official, left to bring the suspect back. Late last week two suspects had been arrested and both were out on bail.

Later developments cast a new light upon the case. From the developments reported it looked as if the owner and operator of the company would have to face a swindle charge.

ON LEAVE FROM ALASKA

A 2C Meade Michael is spending a 30-day leave at the home of his parents, Mr. and Mrs. E. A. Michael. For the past year he has been stationed at Elmendorf Field in Alaska. He will return there August 30 for another year of service.

Miss Catherine Johnson of Los Angeles, Calif., is visiting her sister and brother-in-law, Mr. and Mrs. Clyde McElroy.

EDITORIAL COMMENTS

Vote on August 23rd to Wind Up the Primary Elections

Randall county voters have an obligation to perform on August 23. They will select a sheriff for the coming two years, and in the same election will vote upon a man for Place 1 on the Supreme Court as well as vote for one of two lawyers who are seeking a place on the Court of Civil Appeals.

The name of Martin Dies will appear on the official ballot unopposed. This is for the purpose of making his selection a matter of more than 50% of the voters, as required by law. Of course if there were no other contests in Texas it would be a rather drab affair to go to the polls just to vote for Martin Dies. There are three important posts to be filled.

The law enforcement officer of Randall county who will be selected Saturday, August 23rd, by the voters of Randall county, is one of the most important public officials in the county. The campaign started with three candidates in the race. One was eliminated in the July primary. The voters now have the opportunity of voting for one of the two top men. It would be a shame and a reflection upon the voters of Randall county if only a handful of votes should be cast in this election, and the world would know that the people of Randall county are very careless about the man whom we shall elect to enforce the laws of Texas within Randall County.

Go to the polls.

Vote your sentiments.

If you lived in a communistic state you would be shot or fined heavily for not voting in all elections.

The Canyon News Made Error in Regard to Beer Cans on Hiways

It isn't the first time that *The Canyon News* has been in error!

As a matter of fact it seems that we are wrong about 50% of the time. In one instance we made an error on the editorial page last week in making the statement that the State Highway Department was not keeping the beer cans picked up from the highways.

Our attention was called to the fact that three men and a truck were busy most of the time picking up beer cans which were thrown out along the highways by those who haven't sense enough to leave liquor alone while driving.

This crew picked up a FULL TRUCK LOAD of beer cans between Canyon and Ralph Switch the other day.

With this crew working, it is nothing unusual to pick up two or three truck loads of empty beer cans between Canyon and Amarillo—or rather between Amarillo and Canyon. Amarillo sells the stuff, and unfortunately those from the dry territories drink the booze. We are not charging that all of the beer which is sold in Amarillo is drunk by citizens living outside of the corporate limits of Amarillo, but entirely too much of it is bought and hauled away.

The State Highway boys figured the other day that they were picking up per mile about \$1,000 in the cost of empties which had been spent for booze in Amarillo. Of course they received nothing for their trouble, but the state of Texas was paying the men in wages about \$10 per day, plus the cost of the truck which was used. That was your money being spent.

The tin cans are so thick, so the boys say, that they have to walk and pick up as they go.

The other day we saw a mowing machine bog down when the bar hit a tin can. The blade was either broken or badly damaged.

It is costing the taxpayers of Texas a whale of a lot of money to pick up the beer cans which the careless drinkers throw along the paved highways!

We guess that if the crew was doubled they might keep up with their work. As it is they are always behind trying to keep up with those who drink the stuff. However, if the State was spending enough money to keep the highways cleared of beer cans, just figure out for yourselves what it would be costing the people in the way of new construction.

Congratulations to the State Highway boys for doing as good a job as they are under the circumstances of dealing with an unappreciative public.

Take a Look at Results of Teapot Dome; Compare With '52

Many uninformed persons point to the present corruption in government as a parallel to the Teapot Dome case. Here are the differences:

Truman has frowned upon any investigations in his official family. Both Harding and Coolidge encouraged and assisted in every way to bring the guilty ones to trial.

A number have been convicted; some resigned; but without official approval in the present investigation. The President seems to frown on all investigations.

In the Teapot situation, only nine persons were involved, including six government officials. Of the nine investigated, two were acquitted; four sentenced to the pen; two committed suicide; one died while awaiting trial.

Investigations continue to turn up many cases of corruption in governmental circles.

Why Not Stevenson Play Politics According to Way Game Planned

There has been a cry to high heaven because Governor Stevenson went to Washington to discuss current problems with the President. The cry comes from misunderstanding Republicans, who like to make a great noise about minor issues.

What is wrong with the presidential candidate conferring with the head of the Democratic party? Especially since he occupies the White House? And being briefed by the cabinet members who are close to the works?

Governor Stevenson is entitled to all of the information that he can get. The men who are supposed to know the answers are in the cabinet of President Truman.

We feel that the stay of only a few hours in Washington has not contaminated the Governor; that the information which he received will be carefully screened for its accuracy.

OPS Closes Up Shop and Moves From Lubbock to Big Dallas

The Canyon News has a letter calling attention to the fact that the office of OPS in Lubbock was being closed because of the economy move on the part of Congress.

There is a tone of bitterness in the letter, and certainly of regret because the traveling show will no longer be with us.

OPS may have accomplished some good in certain parts of the nation, but it accomplished little or no good in this area.

We have talked with scores of merchants who spent much money in trying to live up to the requirements of OPS, and have yet to find any praise for the organization.

There were at least a dozen different "experts" who traveled over this section, at your expense, who posed as "experts" but knew little or nothing about the cause they represented, and cared less.

For instance, *The Canyon News* was required to file a cost and selling list with OPS. After the copy had been prepared and sent in, we were notified that nothing was received.

One of these "experts" came by after several months to notify us that we were late in getting in our report, until shown our records. He said he would check up and report.

In a few weeks along came another "expert" who said that we were not required to send in a list, but if we had sent one in that we were "stuck" with the prices quoted. There was no objection to that.

In a few more months here came another "expert" who said that he had reviewed the situation and advised that our report was not in; that none was due; and that we did not come under OPS.

Other merchants who sought advice soon found that Mr. So-and-So was the "expert" whom they should see, and he was a hundred or a thousand miles away, but would be back soon.

All of this government red tape was disgusting to the average citizen, who could see no sense in any of the antics of OPS.

No one around here will cry about this bureau being cut to the bone, or even that it is eliminated entirely.

However, if one of these government bureaucrats gets hold of this we shall probably be censored, and an apology demanded—which will never be printed.

New Jersey Court System Gets A Complete Overhauling

There has been a decided reform in the courts of New Jersey. The judges have been put to work!

Here in Texas the more time the judges can waste, the longer they stay in office. Ever watch a court in action, and see how hot and bothered the presiding judge becomes at the time set for opening, and then see how much time is wasted by the same judges and lawyers as they kick justice in the slats.

When New Jersey decided that the judges must be put to work, the law makers worked out a scheme of weekly reports for each judge to fill out and file. The judge shows just what he is doing with his time! You may say that this is no business of the public's, but let us remind you that all tax money comes from the pockets of the taxpayers, and these taxpayers have a right to know how and where their money is being spent—or even wasted.

The article which we read on court reform in New Jersey is too long to be repeated on this page, but you should investigate court reform and see what can be accomplished when YOU take some interest in YOUR COURTS.

What About Texas? Will We Be Democratic or Republican?

What about Texas?

Will Texas stay in the Democratic fold, or will the voters kick over the traces in November and support General Eisenhower?

There are so many claims from GOP headquarters that Texas is on the verge of becoming Republican that we have started to wonder.

If you will step out and ask the average voter what he thinks of the coming election, you will probably get an answer similar to this:

"I am waiting for developments. I consider both Eisenhower and Stevenson highly capable and honest men; who know little about the organization of our government, but are willing to learn; but I am alarmed at the growth of government under Truman, and his determination to continue his friends in office; that the only way to clean house is to kick every person in Washington out and make a clean sweep."

The person whom you interview may put the case vastly different, but he will likely express his opinion in a similar way.

There seems to be no other way out than to elect Eisenhower in November.

Taft and Russell Friends Are Still Irked by the Conventions

We are told by political writers that both the friends of Senator Taft and Senator Russell are very much upset over the nominations of General Eisenhower and Governor Stevenson, and that as of the present moment they are seeking a way to give vent to their dissatisfaction.

It seems like a peculiar situation when two men are the party nominees who have never before appeared as candidates; never spent a penny in seeking the nomination; and so far have steered clear of political entanglements of the old guard of the parties whom they represent.

So far Stevenson has the best of the argument. He seems to have been able to solidify sentiment in the South, with its 129 electors votes; has a farm plank which is more acceptable to the farmers than the proposal made by Eisenhower; is considered sound with organized labor. His greatest handicap is with Truman's support, which he is attempting to hold to a minimum.

On the other hand, Eisenhower will carry the nominally Republican states, just as Stevenson will carry the nominally Democratic states; has the Negro votes of the big cities which is a powerful element in any election; has the support of young ex-veterans who will stand by their old commander; and has the loyalty of those who want to see the government cleaned up.

Your worst enemy won't do you nearly as much harm as you might do to yourself.

Dwight Eisenhower, Republican nominee, will make more of a play for the Negro vote in the North if he becomes convinced that the chance to win the electoral votes in some Southern States is a slim one at best this year. The Republicans are aware that they may have a chance to win back some Negro votes in key Northern States now that the Democrats have a Southerner on their ticket.

Republican leaders in Ohio feel that Eisenhower made a mistake in not addressing personally the party convention of that State. This was considered an opportunity for the Republican nominee to pay tribute to Senator Robert Taft and even to bring Taft back early from his vacation to line up actively back of Eisenhower.

Joseph Farrington, delegate to Congress from Hawaii, has firmer commitments than ever from both parties in favor of Statehood for the Territory he represents. The hurdle to Statehood for both Hawaii and Alaska still lies in the Senate, where the issue is tangled in the fight over civil-rights legislation.

Adlai Stevenson, Democratic nominee for the Presidency, wants to soft-pedal the band-wagon rush of New Dealers and "Fair Dealers" to his standard. The feeling seems to be that if they were a little less publicly enthusiastic about it, the effect would be better.

Powerful pressures of practical politics are at work tending to push Stevenson more to the "left" and Eisenhower more to the "right" of the positions they would like to take.

HOUSE JOINT RESOLUTION NO. 20

proposing an Amendment to Article III of the Constitution of the State of Texas by adding a new section thereto to be known as Section 61 to authorize cities, towns, and villages of this State to provide insurance for employees; providing for the submission of the proposed Amendment to the qualified electorate; and providing for proclamation and publication by the Governor.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

Section 1. That Article III of the Constitution of the State of Texas be amended by adding a new section thereto to be known as Section 61 to read as follows:

"Sec. 61. The Legislature shall have the power to enact laws to enable cities, towns, and villages of this State to provide Workmen's Compensation Insurance, including the right to provide their own insurance risk for all employees; and the Legislature shall provide suitable laws for the administration of such insurance in the said municipalities and for payment of the costs, charges, and premiums on policies of insurance and the benefits to be paid thereunder."

Sec. 2. The foregoing Constitutional Amendment shall be submitted to a vote of the qualified electorate of the State at the General Election to be held on the first Tuesday after the first Monday in November, 1952, at which election all ballots shall have printed thereon (or in counties using voting machines the said machines shall provide for) the following:

"FOR the Constitutional Amendment authorizing the Legislature to provide for Workmen's Compensation Insurance for employees of cities, towns and villages"; and

"AGAINST the Constitutional Amendment authorizing the Legislature to provide for Workmen's Compensation Insurance for employees of cities, towns and villages."

Each voter shall mark out one (1) of said clauses on the ballot, leaving the one (1) expressing his vote on the proposed Amendment; and if it shall appear from the returns of said election that a majority of the votes cast are in favor of said Amendment, the same shall become a part of the Constitution of the State of Texas.

Sec. 3. The Governor of the State of Texas shall issue the necessary proclamation for said election and have the same published as required by the Constitution and laws of this State.

In two instances, buttons served as the Great Seal for the Texas government.

Henry Smith, provisional governor, and Gen. Sam Houston, the first elected president of the Republic of Texas, used buttons on papers of state in emergencies that didn't leave time to prepare for a better official stamp.

When Smith was elected governor, he had an overcoat with large buttons decorated with a star. He ripped one off and dipped it into the hot wax that was applied for the seal's imprint on governmental documents.

With but one exception, the star has always remained in the seal of Texas, from the time of the republic, through the period it was a member of the Confederacy and under the Stars and Stripes. No seal had been provided when Houston became president of the Republic in 1836. Until one did arrive, he used a cuff button engraved with a rooster and a dog's head.

A farm boy wrote this: "I love the silent comradeship of another person plowing in the same field or across the road."

"I love to hear the gentle purr of the plow, and the soft, musical sounds made when there are pebbles in the soil."

"I love to hear the jingle of the loose links dropped on the traces, and the subdued thud of the horses' feet on the soft soil."

"I love to watch the mellow soil turning over, and to see the unplowed land grow less and less by each round."

"I love the smell of fresh soil, moist and sweet."

"I love to feel myself a part of the great work of Nature that lies around and above me."

"There is genuine joy in letting the mind throw off all fetters and be as free to follow its fancy as the birds that skim above me."

"I love to plow."

There are over 114,000,000 fingerprint cards on file with the FBI. crimes were committed in the U. S.

HOUSE JOINT RESOLUTION NO. 38

providing an amendment to Article III of the Constitution of the State of Texas by the addition of a new Section to be known as Section 50a, providing for the establishment of a State Medical Education Board and a State Medical Scholarship Fund from which grants, loans or scholarships may be made to students desiring to study medicine; providing that such students shall agree to practice in rural areas of this State; providing certain restrictions and limitations; providing for an election and the issuance of a proclamation therefor.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

Section 1. That Article III of the Constitution of the State of Texas be amended by adding thereto a new Section to be known as Section 50a which shall read as follows:

"Sec. 50a. The Legislature shall create a State Medical Education Board to be composed of not more than six (6) members whose qualifications, duties and terms of office shall be prescribed by law. The Legislature shall also establish a State Medical Education Fund and make adequate appropriations therefor to be used by the State Medical Education Board to provide grants, loans or scholarships to students desiring to study medicine and agreeing to practice in the rural areas of this State, upon such terms and conditions as shall be prescribed by law. The term 'rural areas' as used in this Section shall be defined by law."

Sec. 2. The foregoing Constitutional Amendment shall be submitted to a vote of the qualified electors of this State at an election to be held on the first Tuesday after the first Monday in November, A. D. 1952, at which all ballots shall have printed thereon (or in counties using voting machines the machines shall provide for) the following:

"FOR the Constitutional Amendment providing for the establishment of a State Medical Education Fund from which grants, loans or scholarships may be made to students desiring to study medicine."

"AGAINST the Constitutional Amendment providing for the establishment of a State Medical Education Fund from which grants, loans or scholarships may be made to students desiring to study medicine."

Each voter shall mark out one of said clauses on the ballot, leaving the one expressing his vote on the proposed amendment; and if it shall appear from the returns of said election that a majority of the votes cast are in favor of said amendment, the same shall become a part of the Constitution of the State of Texas.

Sec. 3. The Governor shall issue the necessary proclamation for said election and have the same published as required by the Constitution and laws of this State. The expense of publication and election for such amendment shall be paid out of proper appropriation made by law.

ROTC Work Is Being Planned For WT in Sept.

An advanced course in the Reserve Officers' Training Corps will be offered when the new "Branch General" unit begins operation at West Texas State College in September, President James P. Cornette announced today.

Dr. Cornette said that enough students meeting requirements have already enrolled, making it possible to offer the first year of advanced training. About half the men signed up are veterans with 12 or more months of recent active military service, and the remainder have had basic ROTC training at other institutions.

"Advanced students must also complete survey and screening tests, have at least two years more of college, be selected by the professor of military science and tactics, and agree to complete the advanced training and participate in summer camp," according to Capt. George W. Rehn, assistant professor of military science and tactics.

West Texas State was named one of 25 colleges in the nation early in June to receive the Army's new general unit, which allows cadets to choose from the 16 different Army branches, upon graduation from college. Dr. Cornette had for several years sought an ROTC unit for the college, and Representative Walter Rogers was instrumental in securing the West Texas State unit.

"Five hours of class weekly will be taken by the advanced cadets, with four in course instruction and one in drill," Capt. Rehn said. "These students will be designated as Cadet Non-Commissioned officers and Cadet Commissioned officers, and will be rotated in command positions to gain experience as instructors."

All ROTC students at West Texas State will be assigned to the Corps of Cadets, and formed into an organization that approximates the standard military organization, Capt. Rehn said. Freshmen and sophomores will take a combined course of basic training this fall, and present sophomores will take a second combined course in their junior year, enabling them to complete the course in three years, according to Capt. Rehn.

"Cadets enrolled in the advanced course will be paid \$27 a month, and all students will be issued uniforms and equipment," Capt. Rehn explained. "Basic ROTC students will meet class three times a week, earning one semester hour's credit."

Early in the school year, Distinguished Military Students will be selected from the advanced group, and with these chosen on the basis of leadership and scholarship, Capt. Rehn said. Distinguished Graduates may earn a regular commission in the Army.

The fusion of mercury and tin is used for backing mirrors.

Party Given for Ex-Students and Visitors Here

Forty guests and active members of the Wesley Foundation attended a supper at the Methodist Student Center Saturday evening, August 16. The supper party was an ex-student reunion. Miss Joyce Hill was the special honoree. Miss Hill, an ex-student of West Texas State College and the Wesley Foundation, is leaving for Havana, Cuba, August 24.

A buffet supper of assorted summer salads, baked beans, broiled hamburger steaks, ice cream and cookies were served. Mrs. Herschel L. Thurston furnished and arranged the floral decoration of tritomas which was in the center of the buffet. Miss Patsy Key, chairman of the foods committee, was assisted by Misses Colline Brown, Erlene Phillips, Naomi Baker and Harryett Eppler.

Introduction of guests and members followed the supper. Table games and reminiscing constituted the evening program.

Out-of-town ex-students present for the reunion were Misses Lucille Dale, Clarendon; Juanelle Stevenson, Pecos; Betty Barnes, Hale Center; Helen Enochs, Dallas; Rev. and Mrs. A. B. Duncan, Jr., Kemp; Rev. and Mrs. Hubert Thomson, Amarillo, and Rev. Charles Swift, Allison.

And Misses Wanda Gollehon, Dimmitt; Jackie Riddle, Amarillo; Lloyd Parsons, Hereford; Al Thornborrow, Tulia; Dan Stallings, Pampa; and Gene Gardenhire, Estelline.

VISITING MATRONS HONORED AT TEA IN WARWICK HOME

Friday afternoon Mrs. Clyde Warwick entertained at tea honoring Mrs. O. W. Parker of Independence, Mo., who is visiting in the home of her son, O. W. (Bud) Parker, Jr., Mrs. Ernie Murphy, who spent the winter with friends and relatives in Shreveport, La., and who is now visiting her daughter, Mrs. J. M. White, Mrs. J. W. Shanklin of Houston, who is visiting her sister, Mrs. J. A. Hill, Mrs. Ida Barlow of Wichita Falls, who is visiting her daughter, Dr. Ima Barlow, and Mrs. J. W. Shepherd of Austin, who is visiting her daughter, Mrs. Glenn Dowlen, and her son, M. D. Shepherd.

Punch and tea cakes were served to about 20 guests who visited with the honorees from 4 to 5:30 o'clock.

TEA HONORS JOYCE HILL

Miss Joyce Hill, who is leaving soon for mission work in Cuba, was honored with tea in the home of Mrs. W. T. Green and Mrs. Joseph Findley on Thursday evening, August 14. Entertainment consisted in the guests' visiting with the honoree and her parents, Mr. and Mrs. George Hill.

Mr. and Mrs. A. C. Darst and family returned last week after having visited friends and relatives in Sherman and Arlington.

Dr. and Mrs. Howard Bachelder and children are visiting in the home of her mother, Mrs. A. W. Sternberg.

Estacado Pioneers To Hold Reunion On Next Sunday

Ex-residents of Estacado, the early day Crosby county community, many of them coming from a great distance, will hold their annual reunion in the MacKenzie State Park, Lubbock, all day next Sunday. There will be a basket lunch and talks by many of the early day settlers.

Estacado, located northwest of Lorenzo, was the first settled community on the South Plains. It was founded in 1879 by a colony of English Quakers under the leadership of Paris Cox. First named Mariana, it was renamed Estacado in 1886. In its hey-day, it was a bustling community and even had an Academy. But, the colony was disbanded and moved to Galveston county in 1895. Some members of the original Quaker families still live in this area and will attend the reunion.

Even after the Quakers left, the town remained an important trading center until the coming of the Santa Fe Railroad in 1910. The railroad missed the town, and the town diminished to a small rural community—now the center of a rich irrigated farming country.

A reunion association was organized last year with Harry Kelsey of Lubbock as President, Mrs. Frank Hill of Tahoka as secretary, and Bob Brown of Lorenzo as program chairman.

About 150 people attended last year's organization meeting, but 300 to 500 former residents are expected at this year's meeting in Lubbock on August 24.

Texas represents one-twelfth of the area of the entire U. S.

First Walkout Traced To Ancient Egyptians

Strikes and "walkouts" may be news today, but they were an old story to a man named Zenon who lived in Egypt more than 2,000 years ago.

As manager of a great estate for Apollonius, right-hand of King Ptolemy Philadelphus, Zenon was constantly besieged by the discontented peasants who tilled the land. Conflicts, strikes, and complaints were his daily lot. Whenever he would not yield to their terms for better working conditions, the peasants would walk out on him in a body.

Headquarters for these first recorded strikes of labor, was usually a temple where the workmen would seek refuge until their demands were met. Between strikes and walkouts, they would compose letters to Apollonius, complaining of Zenon's "inefficiency and lack of intelligence in managing the agricultural work" on the 6,800 acre estate. Some of them even asked for an audience with Apollonius so that they might air their grievances at greater length and in more considerable detail.

On one side of Zenon were Apollonius, to whom the peasants were forced to pay rent, and the officials, who came to weigh the grain as soon as it was ripe, so that they could confiscate the state's share. On the other side, were the unhappy peasants who felt they were being dealt with unjustly.

If ever a man needed a labor relations expert, it was Zenon. Unfortunately, at the time, there was no one qualified to fill that need. And although he eventually graduated to the role of vineyard owner, cattle-breeder, and sheep-raiser, Zenon died without ever learning the art of getting along with his workers.

Egg May Aid in Correcting Childhood Abnormalities

The electroencephalograph, the device that records brain waves, may become a valuable aid in the correction of certain abnormal behavior that occurs in late childhood.

So says Dr. Donald Lindsley, visiting professor of psychology on the Los Angeles campus of the University of California.

Many behavior disturbances of each childhood are due to brain injuries at birth, he says. Some of these result in paralysis, cerebral palsy or other readily observable manifestations. Others, however, may not manifest themselves at first but may result in abnormal behavior later in life.

With the use of the electroencephalograph it may be possible to spot brain damage immediately after birth. Dr. Lindsley points out. Although damaged brain tissue may not be repaired, corrective training to compensate for abnormalities may be initiated.

The main problem in adapting the device to such use is in establishing satisfactory norms in brain wave patterns of babies. Once the norms are established, he believes the EGG (abbreviated term for the device) may become a valuable tool.

In the future, it is possible that doctors can chart your baby's brain development like they do his physical growth today, Dr. Lindsley declares.

To Thaw Frozen Birds

Poultry may be thawed in the package just before cooking, or the outside wrapper may be removed and the bird thawed more rapidly in front of an electric fan. A 3-pound bird requires about six to eight hours per pound to thaw in a refrigerator. However, an electric fan will thaw a 5-pound bird in three to six hours. Turkeys require more time. If wrapper has been removed before thawing, the bird should be cooked immediately or there will be danger of spoilage. Also, remember that when poultry is not completely thawed before cooking, it is necessary to increase the cooking time so the meat will be done all the way through when time is up.

"Lost Wax" Process

The "lost wax" process is credited to the Italian sculptor Benvenuto Cellini. It is used for making castings of complicated objects. The design is made in a wax pattern, then a plaster mold is made around it. To remove the pattern, the wax is melted, and thus "lost". Then molten metal is poured into the mold, to take the place of the wax, and after it hardens the plaster is chipped away. This process was developed to a high degree of precision during World War II for making parts for machinery.

Raising Goldfish Outside

Goldfish can be raised in an outside aquarium. Several large goldfish should have a space several feet square and at least a foot deep. Common types of outdoor aquaria are rock or cement pools or large tubs sunk into the ground. Many of our native aquatic plants do well in such an aquarium, and as the fish like some shade, a supply of duckweed or a similar plant is helpful. The goldfish will not survive the winter in an outdoor aquarium that freezes over, but they will do well in ponds, under the ice.

Devil's Island is off the coast of South America.

Six Injured in Head-on Crash North of Happy

A head-on collision of an automobile and a pickup truck a short distance north of Happy about 6:15 o'clock Sunday evening resulted in the injury of six persons. The injured were identified as Mr. and Mrs. F. W. Johnston of Amarillo, Charles Morgan of Plainview, Jesse Wilkins of Tulia, James P. McLe-more of Hart, and Mrs. Oma Lee DeSignori, also of Tulia.

The accident occurred between two curves about one-fourth of a mile north of Happy. Mr. and Mrs. Johnston were riding in a

1952 model car which was traveling in the direction of Amarillo. The other persons were in a truck going south.

Those injured were brought to Neblett Hospital. According to an attendant Mrs. DeSignori and Mrs. Johnston were the most seriously hurt of all the victims. Mrs. DeSignori was reported to have suffered a compound leg fracture and other injuries. In the case of Mrs. Johnston, internal injuries were sustained.

According to authorities who investigated the accident McLe-more was driver of the truck.

Among the cars which were only a short distance away at the time of the crash was a physician from Lockney. He stopped to give first aid treatment to those injured in the collision and was assisted by other motorists.

Railroads act to cut their losses on passenger traffic.

Dear Priscilla -

Your letter at hand, as our Grandma's would say. I think our grandma's would be surprised and pleased at how much we think of them—Fashion has really turned the pages back. Nostalgic things such as sugar scoop hats—leg-o-mutton sleeves, tapered skirts.

Of course "Grandpa" is getting in the act now — the latest brain child of "White Stag" called "Calf Skinners." They are an authentic copy of the pants the calfskinners wear in the packing houses. Nancy must have several.

In a rush — we are unpacking and pressing our Fall things.

Love and kisses,
Perry Lou of PDDS

Camels have long eyelashes to protect their eyes against blowing sand.

ST. ANN'S ALTAR SOCIETY HAS PLANS BAKE SALE SATURDAY

The women of St. Ann's Altar Society met Tuesday night at 8 p. m. Plans were made for a Bake Sale which is to be held Saturday, Aug. 23rd, at Cooper's Market. The women should have on hand plenty of delicious pies, cakes and cookies. Come early so as to have a better choice.

Arrangements were made to serve ice cream, cookies, and cold drinks to the children, at the end of the week's long Catechism classes.

The next regular meeting of the Altar Society will be held Sept. 8.

Great Variety of Wild Game Found by Harrells in Africa

Mr. and Mrs. Newton Harrell and son, Ed, are in Africa for several weeks as part of their 'round the world' tour. The following is a continuation of a report written by Mrs. Harrell.

Friday, July 18, 1952: Lawrence Brown and Lunan, our white hunters met us at Nairobi airport with a Chrysler car and Safari truck. They carried us with our 12 pieces of luggage to a hotel where we were given a cottage in which to spend the night.

The hotel has a long veranda with table and chairs which were filled with Britishers enjoying light drinks. The long, plain dining room is quite long and roomy and filled with black boys waiting tables, each bringing one thing to the table. There was no lobby, only a tiny hallway for the hotel desk.

Our cabin had a bath, two bedrooms and a kitchen where the black boy fixes tea and brings it to our bed in the morning at any time we specify. He lives in a tiny house about ten feet square in the yard.

Mr. Brown took us to a store run by Indians to get some clothes we had ordered to be made for the hunt. Our guns, ammunition, films and some clothing which we had shipped out of New York on March 1, weeks before we left home, had not arrived. We were really disturbed.

The ship carrying our supplies had been lying just off shore at Mombasa for a month waiting a chance to get a berth to unload. Shipping is that bad, since there is only one port in Kenya. Over four months time had elapsed since this ship had left New York. (Since we have landed, there is a chance we can get our things in a few days, as the ship has docked and they are beginning to unload.)

Our white hunters were able to furnish some guns. We bought some ammunition and film. After quite a little scouting around for this and that, we were on our way with David Lunan and Dave Ommanney and three black boys in our safari truck.

Fully Equipped
Tents and equipment enough for a circus have been folded and rolled for transport in the Dodge truck or lorry. Our safari truck is a Chevrolet truck with body built to suit their needs. Two wide seats are in front and the back left open for game. The guns are in an upright case just behind the driver. We will always have with us two guides and three black boys. The others clean around camp, cook, wash, iron, move camp, skin, cure heads, etc.

The truck with provisions, tents and cots has gone on ahead to make camp. All together there are 13 black boys, two hunters, Newton, Ed and I. Dave Lunan, our first guide, looks like Cary Grant, smokes a pipe, speaks perfect English without moving his lips, is tall and lithe and walks like a cat with a spring in his step. He knows at first glance every animal as far as he can see it. He is cautious and takes no unnecessary chances. He has a scar from a "run in" with a leopard. He is a perfect gentleman and a fine host. Our second guide is a fine young fellow who is on safari for the first time as

in Swahili (native tongue) and the boys came from the other campfire bringing food. The first course was thick soup with sandwiches; next weiners, mashed potatoes and sliced green beans; last came canned peaches and cream and coffee. Also there was butter on the table.

Masai Country

This part of the country belongs to the Masai tribe. They live in houses built of woven sticks plastered with cow-dung and they smell yards away. The houses are placed close together in a circle to form a fence or enclosure to corral their cattle.

Each family has its herd of cattle which they herd on the plains. They eat nothing from these cows but a mixture of blood and milk, soured and clabbered. They take a quill and drain the blood from a cow once about every 40 days. The men wear nothing but earrings and two pieces of skin fastened on one shoulder. They carry a long spear to protect the herd from lions and other beasts.

The women's apparel differs from the men's only in their wearing all the bangles they can fasten to an ear ring and wide bands of copper wire or beads on legs and arms.

First Kill

Ed killed the first game yesterday, Saturday, July 19, with Lunan by his side. They started into a herd of Gazelle. Ed shot a Tommy and we all followed to see the skinner clean him while the truck came to pick him up. The meat tasted like lamb. It was better for breakfast than supper.

(150 miles southwest of Nairobi, where rainfall is 60 inches). This has been a long, exciting day with many annoyances for Mr. Lunan. The provision truck had a faulty carburetor and we would wait for them to come; then we would have to back-track to get them. Finally we slowed down to keep within sight of them at all times. We traveled perhaps 80 miles today but the goal was 90.

I can't imagine a better camp site unless there would be more level ground and shorter grass. We seem to be in the heart of game country. If there is better hunting, I don't see how that can be possible.

We have seen thousands and thousands of game of 18 different kinds. The farther we come the thicker they become.

Game Is Thick

Great herds of gazelles, Thompson and Grant variety; kongoni; impola; topi; eland; and wildebeeste; several wart hogs with tails sticking straight up in the air followed by their babies; many giraffe which looked like great dinosaurs; tiny Dik Biks dart around among the bushes. There were a good many very large ostrich. The secretary bird is about the size of a turkey, grey with white neck and ruff of long feathers around its neck. The greater bustard is a large turkey. We saw two kinds of partridges. There was a jackal sitting in the midst of all this game—waiting to get hungry, I guess.

Just before we pitched camp

tonight we saw a male and two female lions, so we should hear them roar tonight. I stayed awake last night hoping to hear something. I'll probably sleep soundly tonight, missing everything.

There are many signs of elephants in the area—great trees uprooted and barked.

Pictures Taken

We had stopped to take pictures of a herd of kongoni crossing the dim game road when a leopard followed them and grabbed a young one, breaking its neck. We followed the leopard a ways but couldn't shoot it as we were in a prohibited area, so we went back to see the little kongoni still kicking. The guide put a bullet in his neck and left him for the leopard which will come back, the guide said.

Can you imagine hearing lovely music (over the radio) out here 150 miles from Nairobi! We have seen no one but the natives in their original state. There is a 600 mile area which belongs to the natives and they herd cattle and move around over this country. The women do the work. They wear five or six circles of beads or necklaces, arm bands of beaded leather or wide bands of copper wire for bracelets and leg bands. Men, women and children have holes in their ears with all kinds of ornaments hanging from them. Some of their lobes are stretched so long that they hang the loop over the top of their ears. I neglected to say that they do wear a blanket or skin.

Sunday, July 20: We are back in camp after a wonderful day of hunting. This is our first permanent camp and they say we have baths tonight. Aha! A bath in the bush I have to see! This is a beautiful camp site among tall wild fig trees covered with climbing, hanging vines, just like the ones Tarzan climbs. I haven't seen any monkeys in them but we did see four Baboons scamper across the road yesterday.

The black boys are cooking fresh meat and fresh vegetables for tonight—topi (antelope family) for meat; green beans, broccoli and carrots. One boy was ironing our table napkins on a stump with a flat iron filled with hot coals.

Bath in Bush

I didn't think I'd have any more real baths until we were back from safari. Tonight Lunan asked if we wanted baths and of course I did to see what a bath in the bush was like.

Lunan called: "Karioki," etc., etc. in Swahili, and a native came totting a large canvas bucket filled with hot water. He keeps our square, canvas bath tub outside our tent. So he brought that in our spare room and filled it with nice hot water, laid a canvas rug down on the floor with soap and lotion for insect bites (as yet I haven't needed that) and a big towel on the chair near by. I had a wonderful bath and everything I didn't put back on next morning was taken to be washed and ironed right then. (Think I'll move out here.) So that was my bath in the bush!

This part of Africa, 200 miles south of the equator, is cool. We sleep under blankets, with mosquito netting over our beds. We enjoy the camp fire night and morning.

Newton shot the first game today, a topi which is of the antelope family. It fell with the first shot right in the top of the shoulder from a 30-06. We all rushed out to see it and to get pictures. Its color is a blue grey with a darker stripe of blue down the thigh. We saved the head for mounting and the meat for supper.

One of the boys is a Mohammedan and will not eat meat unless the throat has been quickly cut, so Ed killed another topi.

Wilde Beeste

I wanted a wilde beeste. As they are wild and hard to get near, they dropped me out and the truck went slowly on. While the herd was looking at the truck I fired

at the wilde beeste, missing them completely and they ran off. (I must defend myself by saying I had not had this gun in my hand before and I was half standing, shaking terribly). Anyway I had better luck the next time we were near enough to get a shot. I re-deemed myself this time, even have the respect of the native boys. One of the guides said the boys kept talking about it being a good shot (I felt very proud).

Ed also killed a jackal and brought it in to skin it in camp. The young guide says we are a hunting family of good shots (a reputation is harder to live up to than to make). I could be a little more modest and not have repeated that but I feel very proud not to have spoiled it all. I felt pretty bad for a while.

Lions Protected

Every little while we cross a shallow draw lined with trees and bushes. As we came up out of the draw and looked across the plains of tall waving grass, we saw the heads of two lions lying in the grass. They didn't move as we came on. We stopped and the boys took the carcass of the jackal and tied it on the back dragging it by the lions. They cut it loose and drove a little way off to see what the lions would do. They got up, came toward the meat. But we had to move farther away before one came on up, grabbed the meat, shook it, raised his tail, giving a sign to the others. We came up closer to see the performance.

The lions walked off a little way. Two more came out of the bush. The guide said they had eaten and were not hungry or nothing could have kept them away. Anyway, my wilde beeste saved an antelope's life for another day. Lions are protected in this area and we couldn't shoot them but they take a heavy toll of wild life.

Country Like Home

Monday, July 21: The game mostly run in herds, each to its own kind, but on a plain there will always be four, five or six

different kinds. The beautiful plains with grass from knee to waist high runs more game animals than any grass land in Kansas. Wherever you can see the ground, which is not often, the tracks look like a herd of cattle had been along that way.

Sitting under a tree overlooking the plain, having sandwiches and coffee yesterday, I thought how similar it was to having a picnic lunch on the prairie at home. We had the small flies which stay on cattle, so many droppings you could hardly find a place to sit down and there was only the one tree until we came to the next little draw. The different rolling plains are fenced off, in a way, by the draws with trees and bushes.

Hunting Buffalo

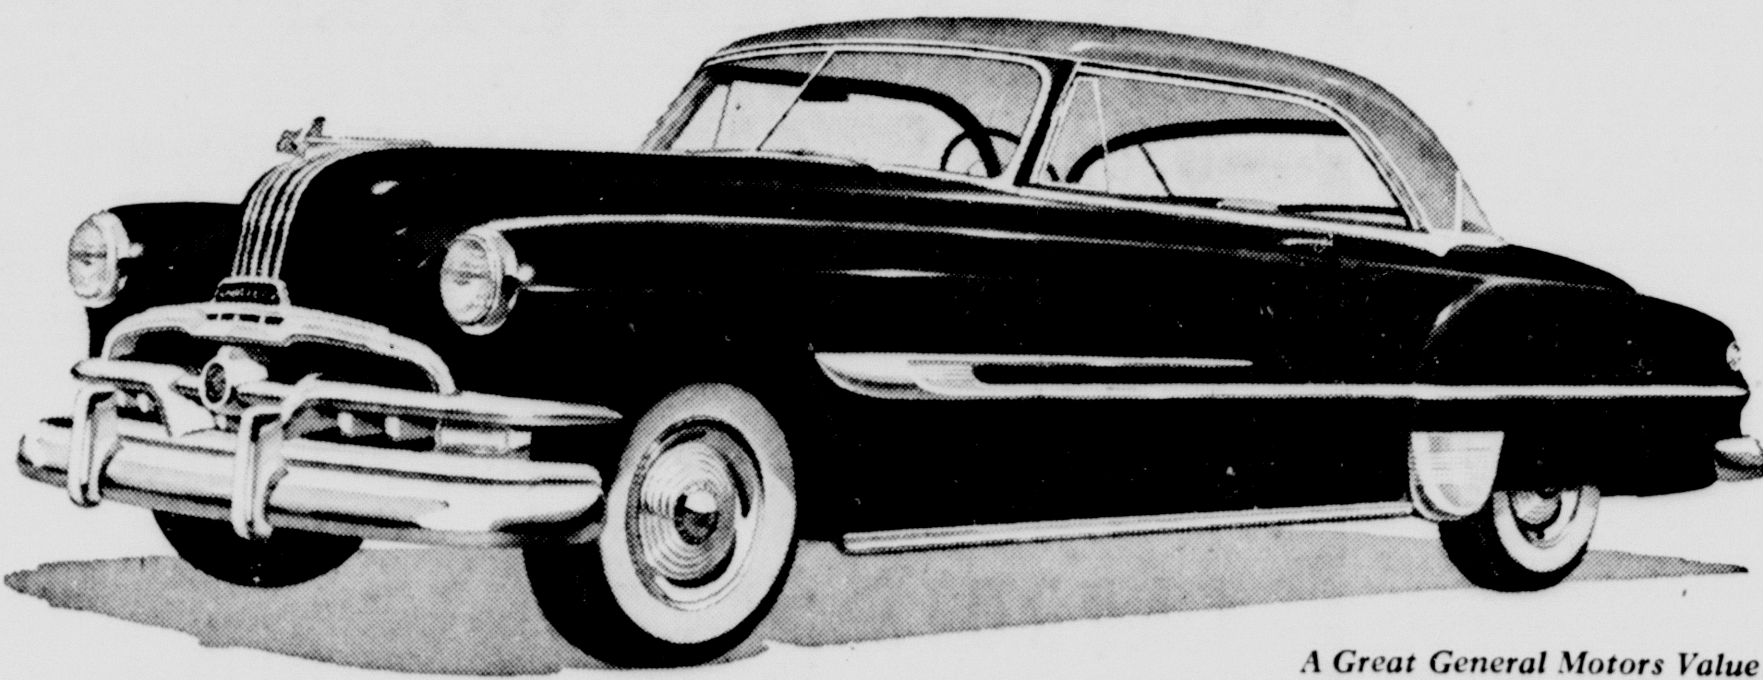

We climbed a grass covered hill to look for buffaloes and sighted one very near. Lunan and Newton climbed down and with guns in hands started for him. The wind was from him and he didn't see them until Newton was ready to shoot. It took two shoulder wounds with a 50 caliber, double-barreled, buffalo gun to drop him. We watched from the hillside and he started off with a rush when the first bullet hit him but didn't go far when the second dropped him.

He weighed around 2500 pounds but is very thin and old. You can tell he is very old by the way his horns are worn and battered—he was so old the other bulls had probably kicked him out of the herd. We swooped down on him taking pictures like the buzzards do after a kill. We will try to get a better head for mounting but will save the horns.

Ed killed a kongoni for another head to mount. He shot it in the heart the first time but it ran on quite a way and he fired again but it wouldn't have been necessary.

We built a blind near this carcass to get pictures of the buzzards sweeping in and tearing off the meat, but they have such keen sight, they got wise and only set-

I got Conoco's NEW 1-2-3
"50,000 Miles
No Wear"
Service!

Now is the time for all smart motorists to discover how Conoco's great new "50,000 Miles—No Wear" Service helps engines last longer, perform better, use less gasoline and oil!

This is exactly the same service that kept test cars new in Conoco's spectacular "50,000 Miles—No Wear" road test!

In that famous 50,000-mile test, with 1,000-mile drains and proper filter service, test car engines showed no wear of any consequence; in fact, an average of less than one one-thousandth inch on cylinders and crankshafts. Gasoline mileage for the last 5,000 miles was actually 99.77% as good as for the first 5,000.

Now you can get this same 1-2-3 "50,000 Miles—No Wear" Service, at your Conoco Mileage Merchant's, today!

1 Your Conoco Mileage Merchant Will Drain Out Grit and Sludge, preferably while engine is hot! "Hot-oil" drains every 1,000 miles flush out grit, dirt, acid and contamination—leave your engine sparkling clean!

2 He'll Recondition Air and Oil Filters! He'll clean filter elements, replace dirty cartridges, record mileage. Every time hood is lifted, he'll check mileage to be sure filters have been serviced at proper intervals.

3 He'll refill with great Conoco Super Motor Oil! Conoco Super is fortified with additives that curb dangerous accumulation of dirt and contamination—protect metal surfaces from corrosive combustion acids—fight rust—and OIL-PLATE against wear.

This is a
HEAVY DUTY
OIL

tled very near in tree tops and in a road on the ground. Yesterday I don't think anything would have kept them away.

Snake Scare

Later we were driving along and some one yelled, "Black Mamba!" That is the most poisonous snake in Africa. I suppose we ran over its tail because it had its head sticking up three feet high out of the grass right along beside the truck only two feet from Ed. He surely began pulling his feet in and the black boys yelled for us to drive on. I wanted to stop for a picture. I wasn't aware of the danger, but the guide said he did not have a shot gun and as the snake was in tall grass it was too dangerous to fool with. It was a 10 foot long, slender snake about like a racer. The guide says antivenum, which he keeps on the safari truck at all times, must be administered in three minutes after a bite.

We saw six new animals today—the reed buck (almost exactly like our white tailed deer), mongoose (weasel), Black Mamba snake, water buck, stein buck, hyena and buffalo.

I didn't sleep very well last night. The lions gave me a lot of trouble. The guide says they were quite a distance away last night and should be good tonight. I had better get a nap now to be ready for them.

We were in camp a couple of hours at noon and I knew we were missing something. Scarcely had we started out when 20 baboons ran across our path and into the bush. They were not especially afraid of us. They are vegetarians and I guess they wouldn't bother us.

Newton killed an impala to be mounted. It is a beautiful red deer with twisted horns. We are looking for a good buffalo head, but they seem to have left this part of the country. They like long grass and stay in certain areas and here the grass happens to be burned off in the plains they frequent. The natives come through digging for wild honey and burn off the long grass and bush. The buffalo moves out. The burning does clean out the brush and the plains look like a green carpet.

On our way back from the natural salt lick, we came near running over a reed buck lying in the grass. He jumped up and ran a short way; then we saw the eight lions that were stalking it. They scarcely noticed us and seemed annoyed that we stayed around. If it hadn't been so late in the day, we would have fed them to get some good pictures.

We chased two hyenas that were so full they could hardly run. We also gave chase to two little blue, bat-eared foxes. When we would get close, they would turn and stare at us; they were pretty little things.

I keep looking for fences. I can't get used to such wide open spaces. The pastures are fenced in a way by trees and bush.

There are many signs of elephants. They push over trees, pull them up by the roots or break them off, strip the bark off and stamp out the grass in places.

Mr. Lunan and 200 natives with eight trucks drove these beautiful animals across one of these plains in the stampede in "King Solomon's Mines." He said they could only drive them one-half mile at a time. They would turn back and run into the trucks.

Several movie companies are booked for safaris with L. Brown and Lunan, preparing to make pictures in Africa this year. Many people in Nairobi took part in the making of "African Queen."

Game Galore

Tuesday, July 22: We were having breakfast at 6 o'clock this morning and were out on the plains by daybreak. The little Tommies were just stretching and getting up from their night's rest. We were out for the day hunting buffalo. Every day we drive through these lush pastures seeing thousands of Tommies; the long grass seems alive with them.

We counted 500 zebras in one pasture. Wilde beeste run and kick up their heels and snort like horses. Thousands of topi stretch their necks and go racing by or stand and look.

The thrill of Africa is not knowing what you will see next.

We saw another big lion and his mate this morning. We believe we saw the same pair on our way back this afternoon, five miles nearer our camp. They take one look at us and go on about their business. If they happen to be in the road, we go around.

Ed killed a wart hog. He got him with a heart shot, the first shot, but he came charging right up out of the creek straight for Ed before he fell. Ed shot again but missed. Luckily his first shot was fatal.

We were driving along talking about Ed's pig when some one saw a buffalo. Lunan, Newton and a skinner went off over the hill but after awhile they came back empty handed. We saw two other buffaloes but they saw us first.

One of the native boys saw two little horns sticking up in the bush. With binoculars we could see a little bush buck. He thought he was hidden and just kept watching us. Newton took him for his head. The animal ran back into the bush quite a ways before he dropped. Everyone followed and I started too, but a native waved me back.

It was thrilling to run through the tunnel in the bush with the natives, not knowing what to expect. This was my preconceived idea of a safari.

See First Rhino

While we were driving along expecting anything, out of the bush came a rhino. To have a look at us. Their little squint eyes can't see much, but I suppose he liked what he saw. He came charging straight for us. We drove right on but the ground was soft and we were a little uneasy for fear we would get stuck and he would tip us over. He turned off and we were relieved.

Scarcely had we settled down when we saw a cheetah and the chase was on. He had a head start in brush country and we couldn't get very close. Lion, leopard, cheetah and rhino are protected in the area. We were taking pictures.

We will still look for buffalo tomorrow. There is plenty of fresh signs around. With the plains so full of every kind of game you wonder why we think we must have buffalo. Our pictures must have a name as all movies do, so we decided to name it "Bogo" (native for buffalo). It may be "No Bogo."

Plenty of Grass

Wednesday, July 23: This country would be taken with cattle ranches if it were not for the tsetse fly. The game would be gone by now if these were meat eating natives. They do have large preserves so the game will be here.

after the land is settled, which will happen sometime.

I never cease to marvel at this luxuriant growth of grass with herds of thousands of animals grazing on it daily and still it looks like a field of waving grain. Springs seep out in the most unlikely places. You can get stuck on a slope near the top of a hill.

A variety of trees—yellow fever tree, upobia, wild fig, whistling thorn—many bushes and vines follow the natural drainage of the land and divide the plains into pastures of all sizes.

Every day we see the thousands of Thompson gazelles (Tommies), kongoni, wilde beeste, zebra and topi. We counted today 34 giraffe in one herd. They are very curious animals. At first you see one and then they seem to appear from everywhere, craning their necks and edging closer.

The impala is a lovely little deer that stays very close to the bush. You see a bush with a dozen does or 15 bucks together. They leap and bound like a deer.

I killed a hyena today. They are such ugly things I didn't mind killing him, but I don't like shooting the pretty little gazelles. (I only eat them.)

Ed killed two partridges and a hyena today.

I'm saving the best until the last.

Get Bogo

Newton got Bogo and we were all so excited we were hours getting settled down. It was a great experience. The animal will weigh

2500 pounds and has a fine set of horns.

We sighted this buffalo in the edge of the trees from a distance. The two guides and a native went with Newton to stalk him. We watched with binoculars from afar. Bogo went back into the bush and came out again. He stood there eating grass, turning his head in our direction then back to eating. All this time the men were coming from behind him along the edge of the clearing. They walked right up on him before they saw him and before he saw them.

He looked up and was off! Newton shot him in the shoulder with a "nine point three," then he and Lunan both shot him but he went into the bush. Now a wounded buffalo in the bush is something hunters and guides alike fear.

They motioned for the truck with the two natives, Ed and me to come to them. Dave, the young guide, took another gun and the others were cautiously nearing the bush. They kept looking to see where the trail of blood entered the bush.

A flock of birds flew up as Bogo started to charge, but Newton and Lunan stopped him in his tracks. It takes a lot of nerve to walk right into the brush, not knowing where the buffalo is nor when he will charge. One of the natives was supposed to let the buffalo charge him while the men did the shooting. He is a good tracker and isn't afraid of anything. He walked right in. Evidently he had a lot of faith in Lunan's aim, if Newton missed, which he didn't. Newton and Ed are both good shots.

We made a dozen pictures with the polaroid camera and some movies. Its head will be fine to mount. The buffalo is a big, dangerous animal and quite a trophy to bring home. I think the natives were as thrilled as we were. They cut off a leg to make soup.

Thursday, July 24: We shot guinea fowl and bustard and they were good eating. Ed shot a little klipspringer, small deer which live on the rocky hills. His hoofs felt like rubber.

On the way back to camp we stopped to watch a group of baboons scamper for the bush. They climbed into the trees and peered at us. One old fellow sat high on a limb and entertained us. We have seen lion every day except one. On that day we saw a cheetah.

On Leopard Hunt

Friday, July 25: We changed camp. Saturday, July 26: Bareketaba Road.

Ed and I killed two Grant gazelles this morning for leopard bait. We found a likely tree (one that slopes and has few branches but a nice fork on which to lay the food) in a beautiful shady glen and built a blind near by. This was a perfect place. Leopards had made many claw marks on the huge yellow fever tree.

The native boys cut open the Grant gazelle, dragged his intestines along the bank of the stream. There was blood and scent all around under the tree. One of the boys climbed the tree which was so tall a fall would have killed him had he fallen out; then others threw a rope to him. He threw the rope over a limb and they hauled the carcass high into the tree, fastening it securely with wire.

Tomorrow morning we check to see if the leopard has been around, if so we come to the blind around 4 o'clock, dropping off the truck as it goes on and slip into the blind to wait.

The natives now bait the second tree while Ed and I have coffee from the thermos bottles.

In the afternoon as we were driving around again, all the animals on the plains were running pell mell from something. We kept watching until we saw some wild mangy dogs after a little impala. They were near the edge in the bush busily tearing up the animal, so Ed killed one and shot another one but he ran away. After all this commotion, we heard one yapping and saw him running off with meat in his mouth. Newton shot but it's hard to get them in the bush. A jackal and two foxes were waiting around to see if they might get a bite.

I had good luck today. I killed an impala and a Grant gazelle with one shot each for leopard bait.

Get Zebra

Sunday, July 27: Newton shot a zebra at 270 yards and the boys skinned it. Zebras are wild and run like a bunch of horses every time we come in sight. We plan to keep the hide. The carcass went to the scavengers as leopards prefer gazelles. Before we had a chance to drive away the vultures began settling on the ground and in trees near by. Two jackals came up and began eating shyly, taking a bite and looking our way. One jackal carried off a chunk of meat. The other one stayed around, going back time and again trying to find an inch of space not covered by vultures. They pile up on top of each other all trying to get at the meat. A hyena came fairly close and circled around a while finally lying down under a tree near by. The carcass was picked clean in 15 minutes. The hyena will eat the bones.

We inspect our leopard trap and find that one has eaten quite a bit of the meat. At 3:15 Lunan, Ed and I are in the blind waiting, 30 minutes or an hour. There was no

easy way to get into the blind. We just came as quickly and quietly as possible. The tall grass was dry underneath and crackled. (It also puts out long runners to trip you). But the wind was high, I hope we get in without notice.

It is quiet in the glen, only the wind blowing in the trees, water running over the rocks, birds and crickets singing. A little bird just hopped into the blind and seemed not to mind us.

Ed has a 300 magnum trained on the tree through the peep-hole. Lunan has a shot gun. I can see a little through the branches of the blind.

Leopard Is Fast

A leopard is so quick you only get one shot and he is down the tree, head first, like a streak if you miss.

Lunan has a scar at the corner of his left eye from a wounded leopard, shot by an American. The white hunter must go into the bush if necessary to get a wounded animal. Lunan said he and the fellow who shot the leopard approached the bush in which the wounded leopard was hiding and thought they were expecting him to charge, he couldn't do anything. The leopard seemed to come from the air, Lunan shot but he came on tearing Lunan's coat to shreds and giving him several scratches and a bad tear near his eye. The gun bearer beat the leopard off and he ran off while Lunan found his gun and finished the leopard.

Why the leopard left Lunan and why he didn't tear into the gun bearer, they never figured that answer. The hunter fell over, faint or tripped or something, he was out of the picture.

So we were sitting, thinking and hoping for one well placed shot. At 4:30 the impala and monkeys left the glen chattering and coughing as the leopard approached. It seemed like 30 minutes before he dug his claws into the tree to climb leisurely and with no effort to the lower limb of this huge tree and lie down full length. That beautiful, brilliant spotted animal shone through the leaves as prominently as the stripes on a zebra. Lunan says they actually lie there a while to enjoy the smell before eating. He probably was not very hungry as he had been eating the bait.

Ed had to get in position and I'm sure I was moving my head trying to get a better view through the branches of the blind. Anyway with one leap the leopard was gone. There is a sequel to this story. We left the leopard blind feeling very downcast and disappointed. The peep-hole was too large and I know I was moving. Anyway, he could see us or know that something was wrong.

We looked for a likely tree in a different place, killed another impala and hung it in the tree for bait, built a blind and started for camp.

Ed Gets Leopard

It was nearly 7 p. m. as Lunan turned off toward our first blind. He stopped the truck quite a ways off and he and Ed walked and crawled to the edge of the glen. The leopard was there busily eating the bait hanging in the tree. Ed took aim, lying down, at about 50 yards and broke the big cat's back. He fell to the ground without moving again.

We heard the shot from the truck and were so surprised and thrilled, we jumped out and ran as quickly as we could to see what had happened.

Everyone was slapping each other on the back, shaking hands and Ed was yelling "Yipee!" I gave him a great big hug and kiss.

We came into camp blowing our horn and the boys in camp came out chattering and jumping around. There was much excitement in camp that night! We took flash light pictures but had to wait until the next day for the traditional "Leopard Dance" put on by the natives.

Monday, July 28: It was a cold morning as we drove to survey the leopard bait in various places. Our license is good for three leopards.

We brought in guinea fowl and lesser bustards.

After trying for days to get close up pictures of the little Dik Dik, we ran across a very tame one. He stood around and looked at us until we drove off and left him. Driving along behind him didn't rush him any. (They are such cunning little antelope, like babies).

The Leopard Dance

When we got back to camp, our boys were ready to give us the "Leopard Dance."

This is a ceremony they go through when big game is brought in. They had smeared blood and flour on their faces, stuck feathers, flowers and green branches all over their heads, in their caps or in head bands. They wore blankets or skins. Each had rattles (tin cans filled with rocks) tied to his ankles and legs to make noise as they danced. Each carried something, a spear or a long knife. One had the tail from my wilde beeste, waving it around.

While dancing and singing around the camp fire, they picked Ed up, chair and all, and marched around with him, "The Great Leopard Hunter." It was great to see Ed laughing and the boys laughing as they carried him high. We hope the movies and recordings turn out well.

Tuesday, July 29: The natives burn off the long grass and brush and some of the fires were close

enough to slow hunting in our area. We put out another bait this morning, so we still wait to see if there are more hungry leopards around. We have seen two others besides the one Ed killed in this vicinity.

Mongoose Chase

The boys chased six or eight mongoose (a striped weasel) trying to stop up the holes to their den and trying to catch them. Dave had one by the tail and it was squealing, but with his coat doubled his hold was not so good and it scrambled into the hole.

Two more rhino were standing in the edge of the bush, but there were many big rocks on the ground and it was dangerous for us to make ourselves known to them. We did try to get some pictures but not too close. They were soon out of sight in the bush.

Later we took pictures of a mother giraffe and her small baby. Three full grown cheetahs and two babies were lying in the shadow of a tree in the protected area. We drove around and came up behind them and took some pictures. They eat their meat where they kill it. They don't drag it up a tree as a leopard does. They have feet like a dog and cannot climb a tree. They slay more animals than they eat just for the fun of it.

Wednesday, July 30: Two more cheetahs slunk around behind bushes, then bounded away along our road this morning.

We were in the native Masai country which belongs to them by right of heritage. This plain and bush country was grazed heavily by the natives with their goats, donkeys, and cows. Their cattle are small and all colors.

Their bush corral enclosed their cattle and houses plastered with cow-dung, thatched roof and dirt floor. It looked like a place for animals instead of people. They looked fat and slick. They wear nothing but a blanket or skin tied at the shoulder.

Little boys wore no clothes at all and it was cold. The little boys herd the cattle. They eat no meat, but live on milk and blood from their cows. I looked into one of

the gourds, that they carry, filled with milk. It smelled strong but not sour. The milk didn't look as it had been strained and there was a little manure on the leather top of the gourd. I didn't drink any of the milk!

Natives Refuse Photos

We took some polaroid pictures and let them see how they looked. They didn't look like they could see very well. They would hold the pictures so close to their mottled looking eyes. Some did recognize us in the pictures but could not recognize their own pictures, because they had never seen themselves. We offered them the pictures but they didn't want them.

Some of our boys have two wives. They can have as many as they can afford to buy. Forty goats, five or six cows and 200 shillings is the price now for a wife among some tribes, much higher than some years ago. The responsibility ends there. From then on the wife does all the work and provides him with food.

Animals that we have seen include giraffe, rhino, buffalo, lion, leopard, cheetah, wild dog, baboon, monkey, hyena, jackal, bat-eared fox, wilde beeste, zebra, wart hog, Tommy and Grant gazelle, impala, bush buck, reed buck, stein buck, water buck, Dik Dik, kongoni, topi, eland, klipspringer, serval cat, mongoose, black mamba snake; birds include the ostrich, secretary, spur fowl, greater and lesser bustard, partridges, guinea fowl, doves, fish eagle, stork, buzzards.

Newton provides the camp with fowl to eat. The guinea is delicious white meat. Partridge is good and the bustard is dark meat.

For the benefit of those who may not approve of hunting, I want to say that if we kill one lion or leopard we will come out even by killing the animals he would normally eat. It is not the few hunters, so the guide says, who deplete the game, it is the natives and lions who kill game by the thousands. Fifty parties of hunters a year is average.

The game is here because this Masai tribe are not meat eaters. One half of Kenya and Tanganyika are in the game preserve.

Randall County 4-H Club Members Go to Encampment at Bastrop Park

Six Randall County 4-H Club members will attend the Texas 4-H Junior Leadership Training Laboratory at Bastrop State Park, August 25-30, as winners in the annual Junior Leadership program, it was announced by Extension Service District Agents Knox Parr and Miss Doris Leggett. The Randall County winners in the Junior Leadership program are Edward D. Bourn, Arvle Edward Marshall, both of Canyon; Larry E. Porter, Route 4, Amarillo; Miss Doris Faye Bourn, Bernice Agnes Grabber, both of Canyon; and Alby Ann Kuehler, Route 1, Amarillo.

These 4-H Club boys and girls represent the 22-county Extension District No. 1.

The leadership lab, directed by Extension Service personnel, is sponsored by the United Gas in cooperation with Texas Agricultural Extension Service of the Texas A&M College System.

During the week-long encampment, the 4-H Club Junior Leaders from throughout Texas take part in group discussions on subjects of special interest to them and participate in a supervised recreational program.

Bourn, 17, is the son of Mr. and Mrs. E. W. Bourn. He is a senior at Canyon High and a member of the Randall County 4-H Club. Young Bourn has been in 4-H work for six years. He has been a member of the District and State Rifle Teams, and the District Livestock and Dairy Judging Teams. He exhibited the grand champion steer in 1949, and has won other high honors with his livestock. He has been a member of the Randall County 4-H Council, president of the County 4-H Council, chairman of the encampment committee, and president and vice president of his local 4-H Club.

Marshall, the 14-year-old son of Mr. and Mrs. Douglas Marshall, is a freshman at Canyon High and also a member of the Randall

County 4-H Club. He has been in 4-H work for three years. His 4-H demonstrations include beef cattle and tractor maintenance.

Porter, 16, is the son of Mr. and Mrs. Wayne Porter. He is a sophomore at Canyon High and a member of the Randall County 4-H Club. He has been a 4-H Club member for six years. He was the Gold Star Boy in the county last year. He is a member of the 4-H Rifle Club and has attended the District 4-H Club Camp. He is also a member of the Dairy Judging Team and has won high honors at the Amarillo County Show, at the Canyon Dairy Show, at district elimination in Lubbock and at the Perryton Dairy Show. He is president of his 4-H Club and has also served as secretary and treasurer.

Miss Bourn is the 16-year-old daughter of Mr. and Mrs. E. W. Bourn. She is a junior at Canyon High and a member of the Loyalty 4-H Club of which Mrs. B. A. Burrus is adult leader. Miss Bourn has been a 4-H Club member for six years. She has attended District 4-H Camp, the State 4-H Round-up, district and state dress revue, and is a member of the Talent Club.

Her 4-H demonstrations include clothing, bedroom, gardening and cereals. She has been president

secretary, reporter and song leader of her 4-H Club.

Miss Grabber, 14, is the daughter of Mr. and Mrs. Frank J. Grabber. She is a freshman at Umbarger High and a member of the Umbarger Junior 4-H Club of which Miss Leona Grabber is adult leader. She has been in 4-H work for five years. She was a delegate to this year's State 4-H Round-up at College Station. She takes an active interest in 4-H dress revues and has been vice president, secretary and song leader of her local 4-H Club.

Miss Kuehler, 14, is the daughter of Mr. and Mrs. A. M. Kuehler. She is in tenth grade at Canyon High and a member of Pleasantview 4-H Club. Miss Kuehler has been a 4-H Club member for five years. She has won honors for completion of goals, food preparation and raising of vegetables.

She has entered five county dress revues and two county bread shows, and has attended three county 4-H Camps. She has been finance committee chairman and reporter of her local 4-H Club.

Two other 4-H Club members from the Panhandle also go to Bastrop. They are Miss Betty Lou McGaughey of Deaf Smith County and Ferrell Meeks of Dallam Coun-

ty, members of the Texas 4-H Council.

These eight young people will be accompanied by Miss Lou Ella Patterson, Randall County Home Demonstration Agent, and John Brazzil, Randall County Agricultural Agent. They will leave Canyon early Sunday morning and plan a short visit to the State Capitol in Austin enroute.

The trip will be made in a bus furnished by Graham-Hoene Implement Company of Amarillo.

Findleys To Attend Michigan Conclave

Mr. and Mrs. Joe Findley plan to leave on Friday for Camp Minnawana, Michigan, where they will attend the Danforth Foundation Conference on "Christianity on the College Campus and in the High School." About 250 delegates from over the nation will attend the conference, which will last a week.

Among speakers at the conference will be Dr. Nels F. S. Ferre of Vanderbilt University, speaking on Christian Education; Dr. Bernhard W. Anderson, of Colgate Divinity School, directing a series of studies on the Bible; and Dr. Howard Thurman, of San Francisco, conducting vespers.

Troop 66 Takes Don Harrington Contest Friday

Boy Scouts and Explorers of Troop 66 won the swimming meet at Camp Don Harrington Friday, August 15, by a score of 24 to 12.

Two events in the 12-year-old class were won by Leonard Miller and Roy Hunter. These two events were the free style and the breast stroke in swimming. In the 15-year-old class Charles Joyner won the free style, John Cross won the breast stroke, Richard Dodson won the side stroke and Bill Harrison won the back stroke.

Both Scouts and Explorers won in the 40 yard eight man relay. The Scout team was made up of Leonard Miller, Alan Hanks, Terry Wilson, Neal Garver, Mac Boswell, James Young, Mike Hood and Roy Hunter.

The relay Explorer team was composed of John Cross, Perry Neal Slagle, Charles Joyner, Jimmy Flynn, Bill Harrison, Jimmy Joyner and Richard Dodson. There was also a report of good parent representation at the meet.

The next swimming meet will be with the Plainview troop at Camp Don Harrington soon after Labor Day. The big council meet has been postponed until Sept. 13.

In the event that enough interest is shown the swimming meets will continue all through winter, says Ed Pettitt.

This year the swimming instructor for the Don Harrington boys was Sgt. H. E. Schmitz from Amarillo Air Base. Carroll Vaughan was the instructor from Canyon. Races were called by Dan Ferguson, Field executive from Dalt. Judges were Bill Phillips from Hereford and Edd Pettitt from Canyon.

The outdoor pool at West Texas State College has been available to the Boy Scouts from 5:30 until 6:30 all summer. This will continue until the pool closes Friday. Then arrangements will be made to use the Don Harrington pool. All scouts are urged to attend these workouts to improve their swimming.

There are also some places in the Scout's ranks for some 11 and 13 year old boys as well as 14 and 17 year old boys.

CUB SCOUTS PRACTICE BALL

Cub Scout Den 4 held its regular meeting Monday at the home of Mr. and Mrs. Stuart Condron. Mrs. Pettitt was den mother in the absence of Mrs. Condron who is still on vacation.

Each Cub was asked how he helped in conservation during the past week. A number of interesting answers were given and discussed.

Members of the den also practiced on their catching. They hope to make a good showing in the baseball game scheduled for Wednesday night. Alan Hanks and James Young were Scouts who helped with the catching practice. Refreshments were served by Mrs. Ray Cole to Dewayne Clay, Jimmy Killingsworth, David Cole, Eddie Pettitt, Dewayne Kiser, Eugene Blasdel and Jess Sheets.

Light travels approximately 186,000 miles per second.

C. L. Sone Will Receive LL.T. at McMurtry in Abilene

Charles L. Sone of Canyon, Northwest Texas educator of many years service, will be honored with the Doctor of Literature degree at the McMurtry College graduation in Abilene, August 28. Dr. Harold G. Cooke, president of McMurtry, announced the selection of Mr. Sone for this honor recently.

Mr. Sone was one of the first graduates of North Texas State College at Denton. He taught in Tulia, Canyon, Slaton, Stanton, Stinnett, and Muleshoe before going to West Texas State where he taught before his retirement.

Dr. Law Sone, president of Texas Wesleyan College at Fort Worth, is a son of Mr. Sone. His other son, Lem Sone, was engaged in the school business before retiring to engage in business. A daughter, Mrs. Ollie Reynolds, lives in Albuquerque.

L. S. JOHNSTON

CANDIDATE FOR

SHERIFF

OF RANDALL COUNTY, TEXAS

L. S. JOHNSTON

I am a candidate for the office of Sheriff of Randall County, where all my business interests lie. And where I have made my living stock-farming for twenty-five years. I believe I can serve this county faithfully, honestly and impartially in the enforcement of its laws.

The only office I have ever held was that of County Commissioner, during which time I did what I could to operate the County's affairs efficiently and economically, and was instrumental in getting a separate tax office for South Amarillo and the County Library Building at Canyon.

I think it is of the utmost importance for the sheriff of a college town to be interested in young people, sympathetic with their problems, but firm in the enforcement of the laws. I believe he should work in close cooperation with the parents of the children.

I believe that the Sheriff's office belongs to the people of Randall County, and should be run openly and fairly at all times, subject to constructive suggestions and criticism.

If elected I pledge that all records of the office will be carefully kept, its finances will be up to date, its files open to the public, and its business run in efficient cooperation with the County Court and other officials.

I believe the office of Sheriff is a full-time job, and that the Sheriff ought to be on hand or subject to call twenty-four hours a day.

If after fourteen years you are considering a change in this office, and feel that my record and my views would promote the welfare of Randall County to your satisfaction, then I would appreciate your vote.

Fairview Breezes

Bro. Earl Lan Troop preached two excellent sermons for us Sunday.

We received one-half inch of rain Tuesday but could use a lot more.

Our revival begins Friday evening of this week. Bro. Lan Troop will do the preaching. Everyone is cordially invited.

Arthur Patterson and wife and daughter, Judy, of Amarillo were welcomed visitors to church Sunday morning.

Mr. and Mrs. Dean Cagle and Lynda attended church here Sunday.

Those visiting in the J. W. Wesley home Sunday were Mr. and Mrs. Frank Rogers, Mr. and Mrs. Dean Cagle and Lynda, Mr. and Mrs. Coye Elkins, Bro. Lan Troop, Hill Smith, and Mr. and Mrs. F. O. Amerson.

Mr. and Mrs. Curley Myers treated the people of the community with a watermelon feast Friday evening at the community center and then the community presented them with a lovely starter set of dishes.

Mrs. Mary Tate and three children are visiting with Mrs. Tate's mother, Mrs. Theo Wise, for a few days.

Mr. and Mrs. Finis Brazil and Mary Alice returned from Colorado Thursday evening.

Mr. and Mrs. G. E. Wesley and grandchildren, Jerry, Nan Earle and Jean Shipman, and Lavena Amerson are vacationing in Colorado.

Mr. and Mrs. Richard Evans left Saturday for the mountains of New Mexico for a vacation.

Mr. and Mrs. Arthur Patterson and Judy were Sunday visitors in the home of John Patterson.

Mr. and Mrs. Curley Myers, Mr. and Mrs. H. H. Shipman attended a celebration in Tucumcari, N. M., Sunday.

Joyce Gazzaway returned to St. Anthony's Hospital in Amarillo last Monday to resume nurse's training.

Mrs. Frank Rogers is expecting her parents, the Millers, from Dilly, Texas, for a week's visit.

Newspapers, in the form of a daily gazette, were known to the Romans.

Dallas, Texas, is 1,381 airline miles from New York City.

Public Invited To Local Revival

"The public is invited to come to the Assembly of God Church and hear the word of God during the revival now in progress," said pastor Buddie Pettit Monday afternoon. The revival started Sunday night and will probably last for a period of two weeks, the pastor said.

Messages are being delivered each night by Evangelist Dora Lane from Fort Smith, Arkansas. In describing the services the pastor said there was good music and good singing. You will also hear a wonderful message.

The pastor said that the public was cordially invited to these services.

Josephine, Napoleon's wife, had two children before her marriage to Napoleon.

David Belasco, the producer, was once a circus bareback rider.

Alaska's Brooks Range Explored by Scientists

A majestic graveyard of 300 million years ago is the great Brooks range of northern Alaska, forming North America's northern rampart and perhaps the least explored under the American flag.

A systematic paleontological exploration of parts of these mountains has been in progress during the past two summers, conducted by a United States geological survey party led by Arthur L. Bowsher, Sr., Smithsonian institution paleontologist on detached duty with the survey.

The area where these mountains now exist was once the bottom of ancient shallow seas, during the long, temperate, quiet era of earth's history known as the Mississippian, when the dominant form of life—at least the most abundant—consisted of crinoids and their relatives. This was the heyday of these curious animals, which were, for the most part, attached by stems to the sea bottoms. Their skeletons were composed of tiny plates of calcium carbonate very similar to chalk. Thick limestone strata of the Brooks range are made up of broken fragments of the skeletons. In other sections, however, the crinoid remains are excellently preserved.

The crinoids were found by the geologists in great variety, for the most part representing species hitherto unknown to science. At the time represented by the fossils, the climate was probably somewhat warmer than at present, and the animals were apparently able to enjoy favorable living conditions for as long as 30 million years. Life on the land was already well established, and there were many primitive fishes in the seas.

Hitherto, there has been little geological explanation of this region.

Synthetic Spearmint Oil Made from Orange Peels

Synthetic spearmint oil for flavoring has been produced from orange and grapefruit peels, it was announced at the 118th national meeting of the American chemical society held in Chicago.

The new product will supplement and partially replace the natural material, according to Dr. Carl Bordenca, of the Southern Research Institute, Birmingham, Ala., who reported the research work leading to the perfection of the process.

Manufacturers of chewing gum and other products using spearmint flavoring will welcome this new source of supply, since the availability and quality of natural spearmint oil have been variable in past years as a result of the seasonal nature of production and the dependence on crop conditions, the report said. The new process also will solve a problem for the citrus canning industry, for whose by-product orange and grapefruit peels only a limited demand exists at present.

Carvone, as the synthetic spearmint is called, occurs in natural spearmint oil to the extent of 65 per cent and is indistinguishable in odor and taste from the natural material, Dr. Bordenca declared. Partial substitution of carvone for the natural oil has already been accepted for certain uses, he said.

The Hunting Commandments

1. Treat every gun with the respect due to a loaded gun. This is the cardinal rule of gun safety.
2. Carry only empty guns, taken down or with the action open, into your automobile, camp and home.
3. Always be sure that the barrel and action are clear of obstructions.
4. Always carry your gun so that you can control the direction of the muzzle even if you stumble.
5. Be sure of your target before you pull the trigger.
6. Never point a gun at anything you do not want to shoot.
7. Never leave your gun unattended unless you unload it first.
8. Never climb a tree or a fence with a loaded gun.
9. Never shoot at a flat, hard surface or the surface of water.
10. Do not mix gunpowder and alcohol.

Danger of Infection

There is danger of infection in every break in the skin. Germs may be present on the skin, fingers, clothing and unclean dressings, in droplets sprayed from the mouth or nose in sneezing, laughing, or talking. The cleansing and disinfection of all serious wounds should be left to the doctor. First aid stops with the checking of the bleeding, the application of a sterile dressing, and measures taken to prevent or lessen the severity of shock. For small wounds, cuts and scratches, paint the wound with an antiseptic, such as mild tincture of iodine and when the iodine is dry, cover it with a sterile cloth pad, or compress. Blood poisoning sometimes results from "just a scratch."

Dawn of Air Day

Army airplanes flew around the world in 1924. The Air Service became the U. S. army air corps in 1926. In 1927, the great research and development center was established at Wright field, Dayton, Ohio. That same year an air corps plane flew nonstop from California to Hawaii. Maj. Carl Spaatz, Capt. Ira Eaker, and Lt. Elwood Quesada, destined to become famous commanders in World War II, kept the tri-motored Kokker, "Question Mark," in the air for almost 151 hours by refueling in flight in 1929.

The number of adult polio pa-

Wayside News

The Chas. Kennedy family were Amarillo shoppers last Friday.

The Glen Mahler family of near Borger spent the week end in the E. J. Mahler home.

Mr. and Mrs. W. R. Franklin honored their son, Glen, and wife of Dayton, Ohio, with a turkey dinner Thursday p. m. and also celebrated the birthdays of W. R. Franklin; also Mr. and Mrs. Roy Franklin of Canyon.

Mr. and Mrs. Robert Gusa of Canyon spent the week end in the E. J. Mahler home.

Mr. and Mrs. George Denny and family, also her mother, Mrs. Fanny Stevens, visited relatives in Oklahoma last week.

Mr. and Mrs. Glen Franklin and Wayne Sluder of Dayton, Ohio, and Mr. and Mrs. W. R. Franklin were guests in the William Payne home in Clarendon last Tuesday.

Mrs. J. R. Stockett, Mrs. Billy Spann and Mrs. John Ralph Kennedy and children visited relatives in Amarillo last Friday.

Daylight saving time was first adopted in the U. S. in New York City in 1918.

Geographic center of North America is in Pierce County, North Dakota.

The United Nations Secretariat Building in New York is 39 stories high.

Before Lindberg's famous flight, 64 people had crossed the Atlantic by air.

The Panama Canal is 50½ miles long.

Red, yellow and blue are the three primary colors.

VOTE, AUGUST 23, 1952

For the Re-election of

M. E. CANTRELL

Sheriff of Randall County

I hope that the voters of Randall County will take time to go to the polls on August 23.

The office of Sheriff is the only Randall County office to be filled in this primary, but I assure you that it is a most important office so far as law enforcement is concerned.

M. E. CANTRELL

I am running for re-election strictly upon my own merits, qualifications and my past record as a peace officer. My books are always open for inspection of any or all citizens who wish to investigate my record; and my accounts are carefully audited by the County Auditor and approved by the Commissioners Court.

With my past training as the Chief Law Enforcement Officer of Randall County, you will not be voting for an amateur or an untried public official. I have successfully passed the strict training and examinations of the FBI, and I offer you the benefit of this training in law enforcement.

It has been my purpose to keep Canyon and Randall County as free as possible of crime. Due to the co-operation of the Churches, schools, and parents, juvenile delinquency is seldom heard of in this county. I have received and have given full co-operation of the State Highway Patrol, the City Police of both Canyon and Amarillo, and the Liquor Enforcement officers in holding crime and the liquor business to a minimum.

I shall appreciate continuing to work with and for the people of Randall County for the next term of office if you see fit to re-elect me on August 23.

M. E. CANTRELL

Sheriff of Randall County, Texas

**TO THE PEOPLE
OF THE
18th DISTRICT OF TEXAS
FROM YOUR
CONGRESSMAN
Walter Rogers**

This is the first newsletter that has been written in several weeks for the reason that I have been visiting in the District, as many of you know. I am sorry that I wasn't able to remain in the District longer, but was forced to return to Washington in order to appear in behalf of several constituents before some of the bureaus.

Shortly after coming to Washington I discovered that a personal appearance before these bureaus on behalf of veterans and other persons whose rights were involved was much more effective than letter writing.

The drift toward assembly line treatment of many of these problems was alarming to me. A great number of these people whose daily lives and businesses could be materially affected by these bureau directives do not have the finances to make a personal appearance or to employ counsel to represent them. It is my thought that if enough appearances are made before these boards and bureaus on behalf of these unfortunate people by the elected representatives, much good can be accomplished toward proper treatment of the matters.

JOE S. MOSS
of
GARZA COUNTY

For
ASSOCIATE JUSTICE
of the
COURT OF CIVIL APPEALS
at
AMARILLO

42 years old; married; one child; church member; veteran; young enough to do the work; old enough to know how.

Endorsed by a majority of the lawyers in every county of the 46-county district, including your own. Ask your own lawyer, whoever he is. He knows. In first primary his home county (Garza) gave him 1,333 votes to only 223 for all three opponents.

VOTE FOR
A PLANNED CAREER
IN THE CIVIL LAW.

MOSS MOSS MOSS

(Political advertising paid for by friends of Joe S. Moss)

During the last session of Congress the Veterans Affairs Committee, of which I am a member, had before it a bill providing that claims of veterans could be appealed from decisions of the Veterans Administration to the courts. This was known as the "Judicial Review Bill." I was on a subcommittee that held hearings on this bill, and I state to you frankly that I hoped it would pass.

It did not reach the Floor of the House before adjournment, therefore it must be taken up at a special session or refiled after January 3, 1953. It is my intention to see that such a bill is refiled so that these veterans may have access to the courts, where they can make a personal appearance and be viewed as a human being rather than another file number.

The trip to the district was most enjoyable and I hope to return for another visit as soon as the backlog of work in the office has been disposed of. There were many places that I wanted to go but could not because of the limited amount of time.

Two of the most impressive sights that I viewed during the trip were at Stinnett and Dumas. The one at Stinnett was the grand improvements that have been made there. Sometimes as you watch these improvements progress they do not appear as outstanding as they do to one who has been away from the town while they were being made. This work at Stinnett has certainly done wonders for the town and the citizenship there are to be highly commended for the fine and outstanding progress that they have been making.

The other matter to which I refer is the new hotel Sneed at Dumas. I had the honor and pleasure of attending the opening ceremonies when the hotel was officially opened. I heard a wonderful talk by Harold Dunn, and wish that his talk could have been heard by all of the people in that section of the country. In fact, it would have helped for it to have been heard by every American.

One of the most impressive things about the hotel is the fact that it was built without aid from Washington. The people of the Dumas community can be justly proud of their accomplishment and the great contribution that they have made to the Panhandle, not only in the erection of a fine building, but in proving that progress can be made by a local community without help of the federal government.

Everything in Washington is quiet at the present, but as most of you know, it could well be termed "the calm before the storm." Should the President call a special session, the pot will certainly begin to boil. Should he not call a special session, the calm will be short-lived, because there are many things to be done by the 83rd Congress.

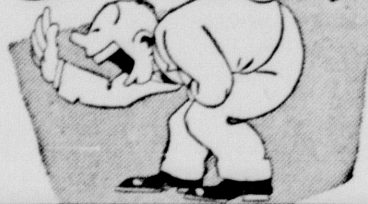

The Eisenhower planners are a little worried by the fact that Congress planned it so that old people will get an increase in their pensions with the October, 1952, checks, just a few days before they vote. General Eisenhower came out for bigger pensions to make it harder for Democratic candidates to get all credit for the new raises.

Charles E. Wilson, former Mobilization Director and former head of General Electric, is likely to be offered the job of Secretary of Commerce if Eisenhower wins in November. Mr. Wilson, a close friend of the Republican candidate, is to take an active part in the campaign.

No major shake-up will occur in the high command of American military services and military forces regardless of who wins in November. The officers who hitched to the kite of General George Marshall and who did not trail with General Douglas MacArthur will continue to get top posts.

In the important State of California, a private poll turns up this in its first returns: Eisenhower, 53 per cent; Stevenson, 39 per cent; undecided, 8 per cent.

SLAP STICK

JUST REWARD

Two Irishmen, meeting one day, were discussing local news. "Do you know Jim Skelly?" asked Pat. "Faith," said Mike, "an' I do." "Well," said Pat, "he has had his appendix taken away from him." "Ye don't say so!" said Mike. "Well, it serves him right. He should have had it in his wife's name."

Smart Father

Father looked hard at his wife and then at his son. "That boy has taken money from my pocket!" he stormed.

"Ernest," she protested, "How can you say that? Why, I might have done it."

Father shook his head. "No, you didn't; there was some left."

Habit Forming

Judge (in dentist chair)—"Do you swear that you will pull the tooth, the whole tooth, and nothing but the tooth?"

Turn About

A ladies' sewing circle is a gathering in which more husbands are darned than socks.

CURE FOR HICCUPS

A man rushed into a drugstore and asked the druggist how to stop the hiccups. The answer was a slap in the face. Amazed and angry, the man demanded the reason for such behavior.

"Well," the druggist said, "you don't have the hiccups now, do you?"

"No," shouted the customer, "but my wife out in the car still has."

Seldom Seen

People don't miss money they don't see or handle—that's why husbands and small taxpayers are so unconcerned.

Solves Everything

Mary loved John, but she worried about the way he squandered money when they went out together. Finally she consulted her mother.

"How," she asked, "can I stop John from spending so much money on me?"

Said her mother with a sigh: "Marry him."

REMAINS TO BE SEEN

There was a loud knocking on the door.

"Who is it?" an irritable voice shouted.

"Patrolman Smith," the knocker answered.

"Well, what do you want?" the woman's voice cried again.

"It's your husband," the patrolman said. "A steamroller just ran over him."

"Well, don't just stand there talking," commanded the wife. "Slide him under the door."

Must've Disappeared
MacTavish and McCleary were arrested for being drunk and disorderly. During the hearing of the case the judge asked:

"Where is the other man?"

"What other man, sir?"

"The man who paid for the drinks."

FUN FUN

A young lady remarked to a male friend, that she feared she would make a poor sailor.

The gentleman promptly answered: "Probably; but I'm sure you would make an excellent mate."

Waterloo, scene of Napoleon's defeat, is in Belgium.

We used to call it handwork. Its purpose, like its name, was simple. Mainly, it was busy work for ladies who, supposedly, had time on their hands. Millions of daydreams have been woven into as many yards of crocheted or tatted lace. Scores of dozens of embroidered pillow slips have been stacked on the shelves of as many troubled minds. And hundreds of hand-painted sugar bowls hold more of a desire for self-expression than they do of the tiny sweet crystals for which they were intended.

But handwork has come of age. Women's hands have gone to college, and have learned that they're all tied in with their minds and emotions; with correct appearance and the bank account. Now instead of handwork, we say applied arts or creative design.

Today's creative arts are really an approach to the philosophy of living; or so we're told. It's no longer so smart to know how to make something as it is to know when to make it and when to buy it already made. Instead of worrying about a tiny imperfection in a handmade object, we learn to lose sight of the small error in the whole effect. What was once a flaw may now be freedom of design, which gives the finished piece life.

We are learning self-confidence through an appreciation of good design. Whether we select it or make it ourselves, under the new plan, our heads, our hearts and our hands come out of the experience in harmony with life.

We like the new approach. It has a satisfying sound. But somehow we still feel that old-fashioned handwork has simply been psychoanalyzed. About all we've done is go out the side door and come back in by way of the front.

Brewster County, Texas' largest county, is bigger than Delaware, Rhode Island, and the District of Columbia combined.

Fleas do not have wings.

TWO FEW INSTALLMENTS

"How do you like my new frock, Jack? I bought it on the installment plan."

"Better take it back and get a few more installments. We're going to a respectable party."

JUST AS MUCH

Joe — I met my wife in a very funny way—I ran over her in my car and later married her.

Brown — If everybody had to do that there wouldn't be so much reckless driving.

LIFE GETS LIKE THAT

Jinks — Have you got your automobile paid for?

Binks — Practically. Three more payments and it will belong to the fellow that bought it from the chap I sold it to!

President Truman is to use the resources of the White House staff to help Adlai Stevenson with some of his campaign problems. A liaison staff between the White House and headquarters of the Democratic candidate will keep the flow of campaign information going and help get answers to important questions.

The Republican organization built by Senator Robert Taft with painstaking care for getting out a big Republican vote in November has disintegrated since the Republican Convention. The Eisenhower forces are having to build their own machine.

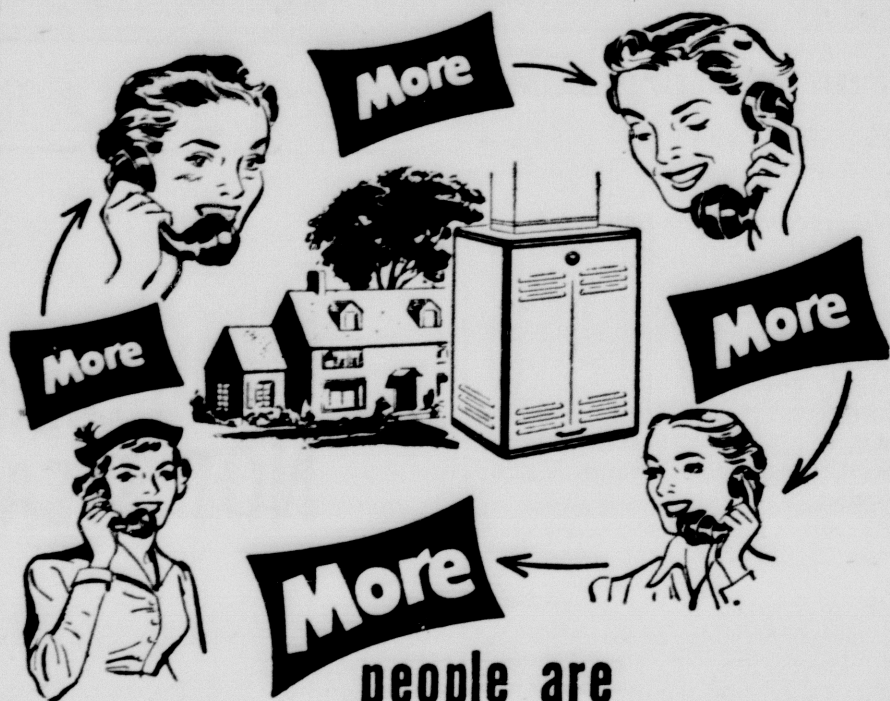

Dwight Eisenhower, for the Republicans, is warming up to the idea of a whistle-stop campaign with plenty of parades. One group of advisers has been urging a very dignified campaign, without too much rubbing of elbows with the masses.

John L. Lewis, head of the Mine Workers Union, is planning to ask his miners to vote for Stevenson. Lewis, who has inclined to the Republicans in the past, likes Stevenson this year.

Jacob Arvey, Democratic boss of Chicago who sponsored Adlai Stevenson when he ran for Governor, is telling friends that he definitely is not interested in a Cabinet post if Stevenson is elected.

John Alden's wife's maiden name was Priscilla Mullins.

Witchcraft Helps Mistreated Wives With Erring Mates

KNOXVILLE—Wives with wandering hubbies need only to know a trick or two of sorcery to ruin the Casanova plans of their scoundrel mates. This comes from a man who practices witchcraft.

If the mistreated wife will wrap one of hubby's neckties around her leg when the rascal leaves for a rendezvous, he'll find it impossible to make any progress with his outside love.

This advice is written in Dr. Obie Lee Roddie's little, black book, along with his other sly tricks for "laying a burden on your enemy's heart," "winning court cases," "busting up a party" and causing "sudden death."

The witch doctor who doped out the hexes was himself a "sudden death" victim. He was shot to death by a woman who said Roddie had put a 24 hour death hex on her.

Maybe the doctor failed to take some of his own advice which is included in the little book. He could have concocted a "lucky hand" of rattlesnake potion, John the Conqueror root and love powder. Worn pinned to the underwear, it is good for three months' service.

The book says Roddie could have protected his home with a witch's fire made of old shoes and sulphur. The ashes from the blaze, with a bit of black pepper stirred in, may be scattered about the yards to provide defense against evil.

A New Name Is Coined for American G.I.—Rotatee

WASHINGTON—The G.I. has been called plenty of things and now comes another name. In the Revolution he was a ragged continental, and more recently he has been a doughboy, G.I. dog-face, draftee and trainee and now he is also a rotatee.

This new word that sounds like a drumbeat, latest triumph of gobbledygook, turned up recently. The man who used it is none other than Frank Pace, secretary of the army.

Perhaps a rotatee is a returnee from Korea. The latest addition to the language came about thusly: Pace was reporting to the senate preparedness subcommittee that a shortage of Waes and budgetary ceilings reduced the possibilities for transferring combat-qualified men from desk jobs. He said, however, that "combat rotatees" were being used to replace some of them.

As one Pentagon wag put it, the draftee has gone full circle when he becomes a rotatee.

Young Evangelist Wants To Sport Poodle Haircut

HOUSTON—Renee Martz has two ambitions. The 11 year old evangelist's old wish is to convert more people to Christ. Her new one is to persuade her father into letting her get a poodle haircut.

Renee is the daughter of a Baptist minister, the Rev. Jack Martz, who turned traveling evangelist. When Renee was 4 she decided that she should follow in his footsteps.

Since that decision she's circled the globe twice, converted 40,000 persons and "packed houses" everywhere she's gone. But, except for the maturity that comes over her when she speaks, she's still a normal child.

She likes to climb trees and eat double dip hot fudge sundaes. She makes friends easily, and can out-fight the best of them. Her admirers say she looks like a brunet Shirley Temple and sings like Judy Garland.

But when she opens her mouth she's no longer a child. She speaks easily on such topics as politics and fashions.

She still likes dolls, however, and sometimes practices her sermons on one of her collection of 100. When she was younger, she considered becoming a waitress, beautician or salesgirl.

Although she says she's never seen a man "as handsome as my daddy," she admits to thinking young Arthur MacArthur is "cute."

Inflation Drives Slovaks To Buy Coffins Real Fast

VIENNA—Reports that Czech currency will be devalued have caused Slovaks to purchase goods—even coffins and operating tables—in an effort to outrun inflation.

"Everything went like hot cakes, including chamber pots, one dozen at a time," said a newspaper article. "A farmer's wife from Sturovo bought an operating table for 30,000 crowns, explaining that two pairs of shoes could be made from its leather cover. In Zilina a young wife bought a coffin, although her husband was still alive and healthy."

"What does it matter if we have to wait 20 years to use it?" she explained. "It will last and one does not need to pay a purchase tax for the coffin."

Clerk of Police Court Unhappy About a Fine

MERIDEN, Conn.—Police Court Clerk Elliot Stretch smiled when he put in the bank the week's receipts from parking tickets. When he reached his car, he had further proof of police efficiency. His car was tagged.

The lower tip of South America is further south than the tip of Africa.

Labor Forges Ahead

WORD OF ADVICE

Woman's Club Speaker: "And, ladies, don't turn away the wanderer seeking food at your door. It's only then that wives will know what a relief it is to see a man eat a meal without finding fault with the food."

THE HARD WAY

An Eastern college professor contends that fast reading is the key to learning. To acquire wisdom the hard way, skip over the fine print entirely.

CONTRADICTION

A Seventeenth Century inn near Knutsford has a sign describing it as an old coaching house. Immediately below is a sign reading "No Coaches."

Horace Ashenfeller of Glen Ridge, N. J., won the fastest 3,000-meter Olympic steeplechase on record when he covered the course in 8 minutes 45.4 seconds to give this country its twelfth gold medal at Helsinki, Finland.

Iran's new Foreign Minister willing to take Anglo-Iranian oil dispute to the International Court of Justice.

The private telephone exchange in the Pentagon is the largest of its kind.

Texas A&M furnished more officers to the Army in World War II than West Point did.

In 1952 West Point celebrates the 150th anniversary of its founding.

Miss America contenders may come from the U. S., Canada, Hawaii and Puerto Rico.

Report Filed on Finances of the County to People

The following statement is published by order of the Commissioners Court regarding audits made by the County Auditor:

Notice to Randall County Citizens: Due to the general public interest that is being manifested in the financial affairs of Randall County at this time and the conflicting reports that are being made, the Commissioners Court of Randall County invites the careful inspection of all interested citizens of the Audit Report of Randall County for the calendar year 1951, as prepared by Cornell and Company, Accountants, Amarillo, Tex.; a copy of which is on file in the County Clerk's office at Canyon, Texas. The following summary of the Fee Offices Section of same is given below as they were at end of 1951 and as they now stand:

M. E. Cantrell, Sheriff
Balance due County as per prior audit report \$ 836.50
Fines and costs in cases which were under-remitted or not remitted (This amount paid on April 11, 1952) 841.60
Fines and costs in cases which have been tried and fines assessed, but no remittances have been reported by the County Clerk 839.50

Total due County 12-31-51 \$2,517.60
T. H. Lair, County Clerk
Balance due County as per prior audit report \$205.20
Excess collections over remittances for calendar year 1951 (Errors in Fee Reports) .70
Total due County 12-31-51 *205.90
Ethel Mullins, District Clerk
Total due County 12-31-51

Furlow Family Has Reunion in Lubbock

Approximately 65 persons attended the annual reunion of the Furlow family in the McKenzie State Park at Lubbock Sunday, August 10.

Those attending were: Mr. and Mrs. R. T. Furlow and Katie, Mrs. Donie Collins and Lois, Mr. and Mrs. John Grabber of Canyon, Mr. and Mrs. G. W. Billingshausen of Happy, Mr. and Mrs. T. S. Furlow, of Tulia, Mr. and Mrs. M. L. Bewley and children of Tulia, Mr. and Mrs. Walter Thornberry and Bonnie of Utopia.

Mrs. Lacy Franklin, Mr. and Mrs. Leon Johnson and children and Mr. and Mrs. Tommie Tindall and children of Nacogdoches, Mr. and Mrs. J. C. Coates of Lubbock, Mr. and Mrs. H. G. Whitechurch and Pamela of Crosbyton, Mrs. Ina Whitechurch of Oklahoma City, Mr. and Mrs. S. E. Furlow and Lament of Odessa, Mr. and Mrs. A. H. Furlow, Mr. and Mrs. Lance Furlow and children, Mr. and Mrs. Weldon Blair and Karen, Mr. and Mrs. Roy Ardher, Miss June Rogers and Miss Hulien Preston of Lamesa, Mr. and Mrs. A. B. Furlow and Bobby, Mr. and Mrs. A. R. Furlow and children, Mr. and Mrs. Oscar Furlow and children from O'Donnell.

Ginger Rogers won a Charleston contest in Fort Worth, Texas, and thereby entered upon the career that led to movie stardom.

More battles have been fought in and around San Antonio, Texas, than any other city in the United States.

Truman continues high farm prices two years.

Bible Class Honors Mrs. J. T. Service

On Wednesday, August 13, the Women's Wesley Bible Class of the Methodist Church met for a covered dish luncheon with Mrs. J. T. Service, the occasion being her 85th birthday. Guests brought birthday cards and handkerchiefs.

After the dinner the party filed to the spacious living room to watch the opening of the cards by the hostess, seated in a tiny rocking chair before the coffee table.

The group sang "How Firm a Foundation" and "He Leadeth Me."

Later six mystery stories were told of heroes of the bible for the class to guess. How many of them can you identify?

1. The man whom the devil was allowed to afflict in order to prove the supremacy of character.

2. The woman who left her home land and returned, bereft of her

husband and two sons.

3. The young leader who threshed corn behind the wine press and talked with God.

4. The young herdsman who preached the doom of Israel.

5. The prophet whose unfortunate marriage was symbolic of the apostasy of the Israelites.

6. The preacher who restored to life a young man who went to sleep and fell out of a window.

Often neighbors and close friends are invited to participate in these dinners. Guests were Mesdames Ross Service, Patsy Ray, D. C. Middleton, F. C. Waechter, A. B. Russell and Tom Knighton.

Class members present were Mesdames Polly Bailey, Co-hostess L. L. Gore, Hattie Brasuel, E. C. Penick, R. M. Barton, R. E. Foster, F. E. Haines, J. A. Wiseman, and Misses Sallie McGehee and M. Moss Richardson.

ENROLLMENT SCHEDULE CANYON HIGH SCHOOL

Seniors—Friday, August 22.

A to M 8:45 to 11:45 a. m.

N to Z 1:00 to 4:00 p. m.

Junior Class—Thursday, Aug. 28

A to Z 1:00 to 4:00 p. m.

Sophomore Class—Friday, Aug. 29

A to Z 8:45 to 11:45 a. m.

Freshman Class—Friday, Aug. 29

A to Z 1:00 to 4:00 p. m.

The activity fee of \$1.00 per student will be due at the time of enrollment.

ALL STUDENTS are urged to make special note of the time to report and report at that time for enrollment will be difficult on September 2 when classes will meet for the first time. No one will be allowed to enter a class until he has completed his enrollment.

Some of the country's highest-ranking military officers continue to be convinced that "flying saucers" are more than optical illusions or light refractions. Their theories of what the objects are cover a wide range: Some think they might be new-model test airships of radical design, others offer the view that something new in guided missiles is being given a trial. Also, one of the world's foremost experts on airplane engines is convinced that the "saucers" are entering the earth's atmosphere from outer space.

Nations in Western Europe are letting down in their defense effort, letting U. S. hold more of the bag, now that they are assured by both Eisenhower and Stevenson that U. S. will not forget them when the dollars are passed out. Most governments are balking at 24 months of military service for their youths and are cool to suggestions for more speed in building defenses.

General Matthew Ridgway isn't so sure that it was a promotion when he was moved from Supreme Command in Japan, with a real war to fight in Korea, to take over in Europe where politicians have him "run ragged" trying to keep up European interest in common-defense forces.

Dean Acheson, U. S. Secretary of State, wants to let up on the blockade of Iran, which now prevents that country from selling oil to American firms. Acheson is convinced that the U. S., if it continues to back Britain in her blockade of Iran's export trade, will push Iranians into Communism.

PICNIC AT COUNTRY CLUB HELD BY YOUNGER GROUP

Saturday evening a group of the younger set enjoyed a picnic at the Country Club grounds with Mrs. Mabel Taylor and Mrs. Felix Pierce as sponsors.

Those attending were Virginia and Eddie Leake, Nelda Coffee, Wilford Taylor III, Paula Sue Barron of Los Angeles, Nancy Lynn Atkinson, Debra McDonald, Christina Sykes, Frances Boyd, Royce Gum, Bobby Samuelson, Charles Cooper, Jim Fannin, Barbara Kay Myers and Judy Taylor.

Adlai Stevenson's definition of a politician is this: "One who approaches every problem with an open mouth."

The Capitol of Texas is higher than the National Capitol: 308 feet compared to 287 feet, 5½ inches.

A General Motors Value

PAYLOAD
-1195 extra pounds of it!

—to cut your costs, increase your profits!

GMC engineering brings you this great new Model 470 highway tractor that hauls up to 1,195 pounds more cargo than any other vehicle in the 45,000 gross weight class.

Here are the reasons why. It will pay you to study them carefully.

Sensational new engine. Model 470 is powered by GMC's new 145 h.p. valve-in-head "302" engine—the most powerful gasoline engine for its weight in truck history.

Maximum power-to-weight ratio. The "302" engine weighs as much as 500

pounds less than other engines of comparable power, due to new high efficiency design.

Highest Compression—7.2 to 1—exceeds any other standard gasoline truck engine, accelerates faster. Delivers full power at an easy-stroking 3,200 r.p.m.

More ton-miles per gallon—less dead weight in engine and chassis means more profit in every mile.

Highest payload capacity—upwards of one-half ton greater than any other tractor of the same GCW rating.

Price—the biggest surprise of all. Compare the price you have to pay for this pace-setting GMC against the field. Nowhere else will so little buy so much in a 3- to 4½-ton tractor.

Why not come in and see for yourself!

Employer-Employee Relations Subject Of Rotary Talk

Cliff Mlinar spoke Tuesday at the Rotary Club luncheon on employer-employee relations.

There are three objectives in every business: Get things done; keep costs reasonable; keep good spirits.

Steps that are necessary to attain this goal were pointed out as: Am I tolerant; do I accept responsibility and seek responsibility; do I think for myself; am I calm under pressure; is my work motivated by long range planning; am I a show-off; can I say "no" to myself; do I take rough jobs without self pity; can I take orders as well as give orders; can I make decisions promptly; do I have close friends among both sexes; can I find and admit own shortcomings; do I run my own life.

Leadership is found with the following traits: Originality; popularity; socialability; judgment; aggressiveness; desire to excel; sense of humor; cooperativeness; think hard; work hard; play hard; age, not in years, but the distance I look ahead; scholarship; versatility; ideals.

Goals are necessary in every day work. If the goal is too high, sometimes they defeat the purpose. Sub goals, in which different stages are sought and reached bring incentives; even children do not like to quit their play until they reach a certain stage.

Mr. Mlinar pointed to the greatest discussion on human relations ever printed. It is the Sermon on the Mount, taken from the Bible.

Resolutions of respect for Floyd E. Savage were read and adopted. Dr. J. A. Hill passed the cigars in honor of his grandson who was born Friday.

Visitors were John H. Patton, Bill Stanford, Ernest Wade, F. G. Collins, all of Hereford; W. W. Rusk, W. H. Torrey, Lowell Munday, Geo. McConnell, Irving Tolzein, J. E. Bowman, Arthur Blumh, all of Amarillo; Glenn Wright of Erick, Okla.; Jack Wilson of Lubbock; Jim Coffman of Dallas; Rickey Wilson of Canyon.

Dr. Seymour G. Conner was introduced as a new member of the Club.

Scout Explorers Go to Philmont

Ten Explorer Scouts will leave Friday morning for the Philmont Scout Ranch in the northeast part of New Mexico. It will be the highlight of the summer activities of this group.

The young men will receive several days training on hiking and camping skills and they will then leave the base camp. Upon leaving the base camp they will take a six day hike through the mountains. The ten scouts taking part in this trip are Jimmy Joyner, Charles Joyner, Frank Kimbrough, Richard Dodson, Raymond Haddock, Chas.

Morris, Bill Harrison, Perry Neal Slagle, Doy Hammitt and John Cross.

Leading the boys on this hike will be Explorer Advisor John Morris, Mrs. Frank Kimbrough and Mrs. C. L. Joyner.

Mr. and Mrs. Marklin McElmurry and children and Mrs. W. W. McElmurry of Sweetwater are visiting in the home of Mr. and Mrs. L. S. Johnston and Mr. and Mrs. Lewel Johnston and daughters. Mrs. W. W. McElmurry and L. S. Johnston are brother and sister.

Mr. and Mrs. Holmes Ambrose and children returned Thursday from Nebraska where Mrs. Ambrose has been staying with her parents while Mr. Ambrose was studying in the University of Iowa.

Rev. and Mrs. Arthur Bailey Duncan of Kemp spent the week end in the home of his parents and aunt, Mr. and Mrs. A. B. Duncan and Miss Johnnie Courtney.

Mrs. John Pool and children of East Vaughan, N. M., were house guests in the home of her sister, Mrs. Max Barnard, and of Miss Irene Angel last week.

Mr. and Mrs. E. P. Twyman of Shreveport, La., spent last Thursday night with Mr. and Mrs. C. W. Samples. Mrs. Twyman is Mr. Samples' sister.

Mr. and Mrs. Irby Carruth arrived Monday from their home in Austin to visit with his mother and sister, Mrs. Henry Bradford and Mrs. W. E. Black, and family.

Mrs. D. I. Campbell, Mr. and Mrs. D. I. Campbell, Jr., and son of Garland visited with Mrs. R. L. Campbell last Saturday.

Mr. and Mrs. R. E. Ball have returned from a visit with relatives and friends in Wichita Falls, Texas, and Eureka Springs, Ark.

Miss Paula Sue Barron of Los Angeles, Calif., is visiting her aunt, Mrs. Felix Pierce, and other relatives.

Mrs. Lewis Stoelzing and son returned Sunday to Canyon from Oklahoma City where they have spent the winter.

Cornettes To Hold Open House at the New Library B'ldg

President and Mrs. James P. Cornette will honor the more than 200 summer term graduates and their families at a reception Wednesday night at 8 o'clock in West Texas State College's new library building.

The occasion will also provide an opportunity for an "open house" in the recently completed building. Dr. Cornette said today. The receiving line will be in the air-conditioned main reading room, and refreshments will be served on the second floor of the building.

Receiving students, faculty, and visitors will be Dr. and Mrs. Cornette, President Emeritus and Mrs. J. A. Hill, Dean and Mrs. Walter H. Juniper, Graduate Dean and Mrs. James L. Russell, and Miss Linnie Babston, acting librarian.

Canine Brings Home Pan of Fried Chicken

If you lost a pan of fried chicken Sunday you may find the pan at the home of Mr. and Mrs. Ed Pettitt. The way the chicken and the frying pan got into the possession of the Pettitts is a story about a dog.

The Pettitts have a Labrador Retriever dog that answers to the name of Skipper. Sunday Skipper went out to see what he could find in the way of food. He turned up later with an entire pan of fried chicken.

There's a considerable amount of mystery surrounding the incident. The first puzzling question is where did the dog get the pan of fried chicken. Some people are also wondering why the dog happened to bring the pan and all to his own back yard to eat the chicken.

Mrs. Pettitt said the pan was a very good one. It's a large size frying pan that is in excellent condition, she said. Although the chicken is gone, explained Mrs. Pettitt, the pan could be returned and the fried chicken would also be paid for.

MICHAELS HONOR DAUGHTER, GRANDDAUGHTERS BIRTHDAYS

On Thursday evening, August 14, a joint birthday party for Mrs. Joe R. Cullender and daughter, Carol, was held at the country home of Mrs. Cullender's parents, Mr. and Mrs. E. A. Michael.

Delicious angel food cake and home made ice cream were served. It was little Carol's second birthday. Her mother just had a birthday without age.

Those present were Gene Root, Nancy Root, Mr. and Mrs. John Albers, Beth, David, and Jim, Miss Phyllis Albers, Joe Cullender, Mike Cullender, Sandra Michael, Meade Michael, Mrs. Lawrence Brotherton, Alice, Jan and Richie, all of Gruver, the honoree and host and hostess.

MRS. GEORGE FRANK GIVEN BIRTHDAY DINNER SUNDAY

Sunday Mr. and Mrs. Joe Frank entertained with a dinner to honor his mother, Mrs. George Frank, on her birthday.

Guests were Mrs. Wiedner of Lakeside, Calif., Mr. and Mrs. Ernest Frank and Bill Frank of Adrian, Mr. and Mrs. Ernest Hollenstein of Tucumcari, N. M., George Frank of Enid, Okla., Mr. and Mrs. George Frank, the host and hostess.

CARD OF THANKS

We wish to thank our neighbors and friends for their kindness on the death of George H. Hess. Bern Hess and family, Al Evers and family, Mrs. Frances Hess.

Carol Cummings of Amarillo spent Friday with her cousin, Mary Patricia Haley, and the two are visiting this week with an uncle and aunt in Plainview.

Mr. and Mrs. Robert Schubach of Washington, D. C., are visiting her sisters, Mrs. Lorenzo Wirt and Mrs. Cass Jennings, and their families.

Mr. and Mrs. J. M. Ruthart of Arlington, Colo., are visiting his parents, Mr. and Mrs. L. C. Ruthart, and other relatives.

Mrs. Rudy Wiedner of Lakeside, Calif., is visiting her parents, Mr. and Mrs. George Frank, and other relatives.

Rev. and Mrs. Win Matsler returned Friday from Iowa where they have been looking after business for the past few weeks.

Hud Prichard returned Friday from the Veterans Hospital in Amarillo where he underwent an operation.

Joe Findley returned Friday from Colorado State College, Greeley, Colo., where he spent the summer in study.

Mr. and Mrs. Gerald Warwick and daughter, Ann, returned Wednesday from Iowa where they visited with relatives.

Mr. and Mrs. W. M. Thompson spent last week end in Lamesa and attended the Gold Sox-Lamesa ball game.

Mr. and Mrs. Joe Cox left Sunday to visit with Mrs. Cox's sister, Mrs. John Ralston, in Hughson, Calif.

BELLAH'S SUPER MARKET

Miss Charlotte Arand and Max Bellah Are Married in Impressive Double Ring Service in Greenville Saturday

MRS. MAX BELLAH

In a charmingly dignified formal, double-ring ceremony which held the sincere and affectionate interest of many people in this city, Miss Lula Charlotte Arant, lovely daughter of Mr. and Mrs. Charles Ezell Arant, Jr., 4423 Stonewall St., became the bride of Max Bellah, son of Mr. and Mrs. Alfred Bellah, of Canyon.

The fashionable wedding which had its setting in the spacious sanctuary of the First Baptist Church was solemnized Saturday evening at 8 o'clock with the pastor, Dr. Richard H. Poss, directing the nuptial recitations.

The altar scene where the couple stood for the impressive double-ring rites were defined by a graceful white wrought-iron screen entirely overgrown with polished huckleberry foliage, and outlined with tapering flame-tipped candles in silver holders. Flanking the picturesque background were three identical white hand-woven floor baskets overflowing with spikes of white gladioli and chrysanthemums, and joined together with garland arrangements of lace fern and Shasta daisies, matched with loops of white satin tulle and ribbons.

Myriads of seven-branched candelabra entwined with ferns and holding gleaming white cathedral candles were used against a background of woodwardia fern trees to illuminate the setting. The long bridal aisle was marked with huckleberry attached to each pew with huge white satin bows.

A prelude of nuptial selections including "Because," "I Love You Truly," preceded the ceremony rendered by Miss Donna Gale Sanders at the organ. Miss Sanders also accompanied Miss Jean Dean, of

Sweetwater, soloist, who presented "My Hero," "How Do I Love Thee" as the benediction, "The Lord's Prayer." The traditional processional by Wagner and recessional by Mendelssohn were used before and after the ceremony, and as a background for the pledge of vows Miss Sanders played softly, "Claire de Lune."

The bride, given in marriage by her father, presented a picture long to be remembered as she entered the sanctuary wearing a wedding gown of exquisite Chantilly lace over candlelight satin. Fashioned with a fitted bodice, the dress featured a square neckline softened with dainty frills of nylon tulle, and long sleeves that tapered to petal points over her hands. The extremely full skirt fell from a nipped-in waistline and swept into a full length formal chapel train. Her fingertip veil of French silk illusion cascaded from a shell headpiece of matching candlelight satin accented with pearlized orange blossoms.

The bridal bouquet which she carried was designed with a white orchid framed with stephanotis and showered with flowing streamers of satin ribbons and French illusion.

The bride was attended by her sister, Miss Ann Arant, as maid of

honor, and bridesmaids included Misses Marilyn Haley, of Beaumont, Jeanette Glenn, of Waco, Janet Bush, and Mmes. R. E. Barnard, of Claude, Bruce Henington, of Wolfe City, and Robert Bellah, of Canyon. The attendants were gowned identically in dresses of pink satin and nylon net designed with strapless 'dior' bodices and matching net stoles. The very bouffant skirts, worn over hoops, were caught with dainty flowers which edged the hemlines. They wore small pink crescent-shaped headpieces designed of net and satin, and carried nosegays of pink asters.

The groom's attendants included his brother, Robert Bellah, of Canyon, as best man, and J. G. Pinkerton, of Houston, Hank Baccus, of E. Lansing, Mich., Bill Lirette, of Baytown, H. D. Arant, of Dallas, Bruce Henington, of Wolfe City, and D. Allen Lawshea of Austin, as the groomsmen.

The reception immediately following the ceremony was held in the church. The bride's table, elegantly appointed in pink and white, was overlaid with a white ruffled organza cloth which extended to floor length. The five-tiered wedding cake centering the table was topped with a miniature bride and groom and flanked with the crystal punch service on each end of the setting. Floral arrangements of white chrysanthemums were used in profusion against a background of fern and greenery to further enhance the reception rooms.

The receiving line was composed of members of the wedding party and Mr. and Mrs. Charles Arant, Jr., the bride's parents, Mrs. Frank Paul Beall, of Fort Worth, and Miss Jane Jenkins served the wedding cake while Miss Janelle Williams of New Braunfels and Miss Pat Martin of San Antonio, alternated at the punch bowl. The guests were registered in the bride's book by Mrs. G. Warren Inman, of Denton, and Mrs. Thomas McCormack.

Assisting in entertaining were Mr. and Mrs. H. D. Arant, Mrs. F. E. Shirey, Mrs. Ethel Frady, of Wichita Falls, Miss Helen Timpson, of San Antonio, Miss Catherine Chambers of Grand Prairie, Miss Martha Devenport, Mrs. Alex Kibler, Mrs. Norman Chandler of Denton, Misses Sylira and Mary Belle Frady, of Wichita Falls, Miss Jimmie Evelyn Jones, Miss Wanda Rice and Miss Jane McCoy, of Paris.

For her daughter's wedding Mrs. Arant chose an attractive floor-length gown of gray lace over blue taffeta matched with an off-the-face hat of identical lace sprinkled with rhinestones. Her corsage was of orchids.

When the couple left on a wedding trip to West Texas and New Mexico, Mrs. Bellah was wearing an off-white wool suit accented with navy braid. Her scoop hat was of navy velvet and she wore an orchid corsage.

Mrs. Bellah was graduated from the Greenville High School where she was a member of the National Honor Society, the Junior Standard Club and the Flaming Flashes, and

Mlinar Speaks To Lions About Plans for Hotel

Cliff Mlinar, chairman of the industrial committee for the Chamber of Commerce, spoke to the Lions Club Wednesday about efforts being made to build a hotel in Canyon. Mlinar was the guest of Clark Jarnagin, president of the Chamber of Commerce and one of the officials of the Lions Club.

Mlinar said that everyone was working for the Chamber of Commerce in one way or another. He also pointed out that the present job at hand is not to decide whether or not to build a hotel but to learn whether or not we need a hotel.

The speaker mentioned some of the hotels that had been built in the vicinity. Dumas was the first one he mentioned because it was the most recent. He mentioned the hotel in Hereford because it is the one that received the most undesirable publicity. Other hotels mentioned were those in Borger and Portales, New Mexico.

All of these hotels were the result of research and survey work done by the Hockenberry system. This organization has been doing this type of work approximately 35 years. Where their recommendations are followed little trouble has been encountered. It was explained that in Hereford the people building the hotel deviated considerably from the Hockenberry recommendations and that is where their trouble came.

Canyon offers a large number of advantages for a hotel. Each year West Texas State College graduates four different groups of students. With a modern hotel parents and friends of the graduating students could remain in town conveniently for several days.

There is also a fall homecoming at the college that would bring visitors to the hotel for a few days. Tourists coming here to see the sights of the museum or Palo Duro Canyon would also find comfortable lodging at the hotel.

Besides giving proper facilities for housing the visitors in town, the hotel would also act as an excellent business stimulant.

After explaining these points the speaker pointed out that the hotel which the Hockenberry system was responsible for building in Borger was doing much better than it was expected to do.

The Lions also entertained four visitors. They were: Jud Bailes of Tulsa, Lion Joe Gibson, superintendent of the Canyon Public School System, Jim Comstock of Canyon, and Mack Kennedy of Amarillo.

the University of Texas. While attending college she was a member of Alpha Delta Pi sorority, the Sidney Lanier Literary Society, Cap and Gown, and the Baptist Student Union.

The groom received his education in Canyon High School and is presently attending the University of Texas. He is a member of Delta Upsilon fraternity on the campus.

The couple will establish residence in Austin.

Out-of-town guests for the wedding included Mr. and Mrs. C. Chadwick and Miss Monann Chadwick, of Dallas, Mrs. E. D. Dickson, of Waco, Mrs. Ray Dickson, of Spur, Mrs. M. A. Glenn, of Waco, Mr. and Mrs. W. S. Ross, of Celeste; Mr. and Mrs. Bill Ross, of Paris, Mr. and Mrs. John Inman and family of Sulphur Springs, Mr. and Mrs. Lloyd T. Gjbreathe of Dallas, Miss Margaret Austin, of Dallas, Miss Joan Meeklenburg, of Houston, Mrs. Marion Rice, of Brady, Mr. and Mrs. W. M. Staples, of Dallas, Mr. and Mrs. Robert Bellah and children, of Canyon, Al Lawshea, of Austin, Charles Gilmer, of Gainesville, and Homer Jackson, of Austin. (Special to The Canyon News).

Yardley Agency

We can well imagine that Gov. Adlai Stevenson is worried no little about the tidelands questions that have been placed before him by Price Daniel and Allan Shivers of Texas.

Texas gets millions of dollars a

year in tax revenue from oil produced out of submerged lands. The money goes to public education.

Now the federal government has claimed those lands under a policy called "paramount rights."

Congress passed a bill clearing the states' titles to the lands, and President Truman vetoed that bill.

Now Texas—along with Louisiana and California—want to know what Governor Stevenson would do about such a bill if he should become president of the United States.

Governor Shivers has plainly stated that he will not support

Stevenson for president if the Democratic nominee does not come out for state control of the tidelands.

Attorney General Price Daniel has asked Stevenson to answer some very specific questions along that line.

Stevenson's trouble is that he is more or less on record as favoring federal government control of the lands. He indicated such a stand at the governors' conference at Houston.

If he makes that his positive stand, he will lose much Texas support—and also many votes in

the other Southern states that are opposed to Truman's administration and his policies.

On the other hand, if Stevenson says he is for state control of the tidelands, he is going to be in dutch with the President and other administration and party leaders to whom he must look for help in order to be elected.

In his letter to Governor Stevenson, Daniel pointed out that Stevenson's own state of Illinois claims title to thousands of acres of submerged land under Lake Michigan.

"Your state of Illinois has not yet been sued," Daniel commented,

"but there is no escape from the fact that the 976,640 acres claimed by your state beneath the waters of Lake Michigan are in the same position as the submerged lands within the seaward boundaries of the coastal states, and that the Federal Government will take this property from your state under the same theory of law unless Congress acts to prevent it."

The Texas attorney general pointed out that in addition to Congress, the following national organizations believe ownership of the tidelands should revert to the states: The council of State Govern-

ments, the Governors Conference, the National Association of Attorneys General, the National Association of Public Land Officials, the National Association of County Officials, the National Conference of Mayors, the American Association of Port Authorities, the American Bar Association, the American Title Association, the U. S. Chamber of Commerce, the U. S. Junior Chamber of Commerce, the National Water Conservation Association, the American Municipal Association, and the National Institute of Municipal Law Officers.

Daniel and others have ob-

served that under the same theory of "paramount rights" the federal government could seize ownership of private lands, as well as state lands, without compensation.

In other words, if the federal government is correct, then it has the power to grab your farm and your home, take them over for government use, and pay you nothing.

Robert A. Lovett, Secretary of Defense, speaking of steel strike: "No enemy nation could have so crippled our production."

LOWEST PRICES IN YEARS --- Sale Ends September 2nd

Firestone Slashes Tire Prices

1/2 OFF

ON TOP QUALITY De Luxe Champions

You'll find the lowest prices in town at Firestone during this Pre-Labor Day Sale.

Come In And Save—

We've slashed prices on top quality Firestone De Luxe Champions—the Masterpiece of Tire Construction—the tire that is original equipment on America's finest cars.

Never before have we offered this famous tire at such great savings. This is your opportunity to have the BEST at a sensational sale price.

Canyon, Texas

Nepal, Gurkha Homeland, Guards Doorway to India

The independent Kingdom of Nepal has marshaled its best known "natural resource" — the fierce Gurkha soldier — to guard isolated mountain ramparts adjoining Tibet, where invading Chinese communist troops are on the march.

Nepal, a small country some 500 miles long and 100 wide, is a rectangular "buffer state" wedged between India and Tibet along the awesome heights of the Himalayas. Pro-Western in its ties, the ancient kingdom is now being subjected to a menacing propaganda barrage from communist China.

As the homeland of the Gurkha warrior caste, Nepal has contributed thousands of the famed tribesmen to the British and Indian armies. All are volunteers, and they have won many decorations for bravery and efficiency in two world wars and innumerable lesser campaigns.

Traditionally this mountain kingdom has been known as a land "where nearly every man is a soldier." Since 1768 the various tribes of Nepal have been ruled by the warlike Gurkhas. Upper class titles are modeled on Western military rank. Although the nation itself has lived in peace for many years, Nepal maintains a standing army estimated at 50,000—relatively large in proportion to a population of less than seven million.

It is a country of remarkable geographical contrasts. In the south bordering India is a malarial belt of lowlands, annually ravaged by monsoon floods from silt-laden rivers which rise in the mountains and empty into India's sacred Ganges. Beyond the lowlands are the Siwalik mountains and farther north are the great Himalayas, including many towering but unnamed peaks. Mt. Everest, highest mountain in the world at 29,002 feet, rises majestically at Nepal's northern border.

Wide Range of Temperature Makes Hot Water Ideal Heat

Hot water is a flexible heating medium.

The temperature of water used for heating can be varied as the outdoor temperature rises or falls.

Thus in mild weather the controls which automatically govern the temperature of the water in the boiler can be set for 90 to 100 degrees.

In more severe weather it can be advanced to 120 to 150 degrees. During extreme weather, a temperature of from 180 to 200 degrees may be utilized when and as required.

Changing the temperature of the heating medium in accordance with outdoor temperature has two advantages. First of all, it prevents the discomfort due to overheating. Second, it saves fuel because it prevents the waste which results from overheating.

It is during the mild weather of early fall and late spring that the flexibility of hot water is most appreciated. By circulating water at a low temperature, the radiators or other heat distributors will be just barely warm to the touch. Thus the discomfort resulting from overheating caused by a sudden rise of outdoor temperatures will be prevented.

Thrombosis Fatalities

Coronary thrombosis, contrary to popular impression, is not usually fatal immediately or within a short time.

Results of a study by a leading insurance company show that 70 per cent of a group of persons who had had one or more coronary attacks were still alive at the end of five years, 50 per cent at the end of 10 years, and 43 per cent at the end of 12 years. The study traces survivorship among 540 men for whom life insurance disability benefits were approved because of heart conditions.

"Winter Scours"

Milk production in many dairy herds is going to be cut back sharply during the coming months by "winter scours." When a cow suddenly refuses feed, appears dull, secretes less milk and scours badly, the owner may suspect that the animal has eaten spoiled or frozen feed. But if other cows in the herd rapidly develop the same symptoms, the trouble may be winter scours, a quick-spreading infectious disease. Veterinarians have isolated the germ which causes the malady; it is a "vibro" organism, related to a germ which sometimes causes abortion in cattle.

To Measure Humidity

Measuring humidity is commonly done with two similar thermometers, one of which has a cotton wick, dipping into water, wrapped around the bulb to keep it wet. With published tables (known as "psychrometric tables") the humidity may be determined from the reading of the thermometer with dry bulb, and the number of degrees below this which the wet-bulb thermometer shows. For a dry-bulb temperature of 70 degrees, and 50 per cent humidity, the wet-bulb instrument would read about 58 degrees, i. e., a depression of 12 degrees.

The wake of a ship is the track it leaves in the water.

BEHIND ON THE NEWS

A salesman in Missouri was held up in a small town because heavy rains had caused a washout on the railroad. "This looks like the flood," he observed to a waitress in the local hotel.

"The what?" she asked. "The flood," he repeated. "You know the flood when Noah saved the animals on the ark. You must have read about that."

The waitress assured him gravely. "Mister, on account of all this rain, I ain't seen a paper in four days."

Cause to Be

"You're a pretty sharp boy, Tommy."

"Well, I ought to be. Pa takes me into his room and strops me three or four times a week."

Help!

The paper hanger has no sense. He isn't smart at all.

For though his business is immense,

It drives him to the wall.

Same Difference

"My son plays the piano like Paderewski."

"How can you say that?"

"He uses both hands."

MISUNDERSTANDING

A little man was ushered into the witness-box. After the usual preliminaries, the magistrate told him to tell the court what happened.

The man began in rambling narrative and finally ended up with: "And then my wife hit me on the head with an oak leaf."

"Well, that couldn't have hurt you, surely," said the magistrate.

"Oh, couldn't it?" replied the little man, with feeling. "It was the oak leaf from the center of the dining-room table."

Gay Blade

An American was being urged to betake himself to Athens to see the old ruins.

"Nope," he decided definitely. "I'm going to Paris to see the young ruins!"

High Opinion

One night, when palywright W. S. Gilbert was dining with a friend, a well known actor entered the restaurant.

"I've never thought much of him," confided the friend. "How about you?"

"No one could have a higher opinion of him than I," Gilbert said. "And I think he's repulsive."

To The Point

Boss (to stenographer)—"Are you doing anything Sunday, Miss Jones?"

Steno (hopefully)—"Why, no."

The Big Brute—"Then try to get here a little earlier on Monday morning, will you?"

ASSOCIATION

In this family there was a large number of small children. Little Willie, age six, was taken in one morning to see his father, who happened to be laid up with influenza. Little Willie was quiet, almost reverent, in the sickroom. When it was time for him to go, he went up to his father's bedside and said:

"I bin good, ain't I, pop?"

"Yes, son," the old man whispered.

"Well, then, kin I see the baby?"

TOO BAD

1st Tenant: "The superintendent says that the woman who just moved into that apartment on the third floor is anemic."

2nd Tenant: "My, my—and she looks just like an American, doesn't she?"

Dutch shipyards are enjoying their biggest boom.

Once Feared Herb Is Now U.S.'s Top Vitamin Source

TERRE HAUTE, INDIANA—A modest plant which the Aztecs and Incas originally cultivated but early American settlers feared to eat, is today a favorite source of the nation's vitamins.

It is the tomato, an Aztec plant discovered by the Spanish conquistadores and first grown commercially in this country just a century ago. This plant now produces an estimated \$175,000,000 a year in revenues to growers, according to the American Can Company.

More than five and one-half million pounds of tomatoes were produced in 1950 for processing alone—a gain of about two billion pounds during the last 20 years—the can manufacturing firm explained. Added to this are the 31 million bushels of tomatoes grown commercially for the fresh market last year, and the vast amounts produced by millions of home gardeners.

The popularity of tomatoes took a big jump in 1931, after can company researchers, working with processors, helped perfect a method of canning that would retain original flavor and natural high-vitamin count of tomato juice packed in cans. Before this, a small quantity of tomato juice was used primarily for babies and invalids, the company reported. Today juice and whole tomato packs account for 45 per cent of all tomatoes that go into cans.

The increased consumption of tomatoes in various forms is considered by the U. S. Department of Agriculture to be a definite factor in the steady all-around improvement of the average U. S. diet.

Czech in U.S. Army Ignores Draft Notices from Overseas

KANSAS CITY—The Russian-controlled Czech Army will have to get along without the services of one of its prospective draftees. He's serving with the United States Army in Korea.

PFC Lubmoir Soudil, who came to America from Czechoslovakia four years ago, has been in the U. S. Army for more than a year. But recently he began receiving notices from his home town in the Iron Curtain country to report for induction into the Czech Army. Each new notice is more insistent than the last.

Naturally, Soudil has no intention of answering the Red call to arms.

"I hope my military service will pave the way for my citizenship," said Soudil. "I want to make my home in the United States."

Synthetic Topsoil Grows Bigger, Greener Vegetables

CHICAGO, Ill.—Dr. Eduard Farber of Washington, D. C., told the American Chemical society recently sawdust can be turned into synthetic topsoil to grow bigger, greener vegetables.

Chemically treated sawdust becomes like humus, he reported.

Erosion robs the nation of millions of tons of precious topsoil annually. And lumbering piles up mountains of sawdust, estimated at 60 million tons a year, for which there are no great uses.

The new chemical process might help solve both problems. Early tests with sawdust have been promising. From 10 to 40 tons of converted sawdust were applied to an acre of soil. Seeds germinated sooner and more of them germinated, he said.

Leaves were bigger and greener, and the weight of the produce like radishes, beets, onions and tomatoes were greater.

The sawdust is treated with mineral acids, at temperatures well over the boiling point of water but not hot enough to char the cellulose material in the sawdust, he explained. The sawdust forms humus substances by loss of water and some acid reactions.

New Theory of Creation; Milky Way Born of Clouds

WASHINGTON—A new theory of creation has been presented by Dr. Lyman Spitzer, Jr., director of the Princeton university observatory.

He says latest astronomical evidence indicated the stars of the Milky Way were formed about three billion years ago out of "flying cosmic clouds."

Dr. Spitzer offered no explanation where the flying clouds came from. The report said it "still is a complete mystery."

The theory is that great gas clouds, thinner in substance than the purest vacuum ever produced on earth, gradually condensed into individual stars as a result of gravity and the "pressure" of light.

Navy Gives in to Pupils; Will Not Call Up Teacher

CHICAGO, Ill.—The navy surrendered recently to a 12 year old girl.

She is Janet Smith, who wrote Rear Adm. J. Cary Jones, commandant of the 9th naval district.

Janet, supported by 165 school-mates, asked deferment of their favorite teacher, Perry J. Rockwell, 26, World War II radioman and a naval reservist, who had been called up as of February 1. The children said they needed Rockwell more than the navy did and asked that his service call be put off until June 25, the end of school.

Admiral Jones, after conferring with other navy officials, agreed with Janet and granted the deferment.

Radio and television set production drops 40%.

PRINTING Office Supplies

- The Canyon News is equipped to handle all kinds of printing to meet your business needs.

- Give us a ring at Phone 41 for information as to our facilities to handle your printing.

ONE FARMER TO ANOTHER—Democratic presidential candidate Gov. Adlai Stevenson of Illinois inspects a prize-winning Shorthorn steer shown to him by a young farmer at Springfield, Ill. Governor Stevenson, like his Republican opponent, Gen. Dwight Eisenhower, has a 78-acre farm in Libertyville, Ill. Ike's farm is near Gettysburg, Pa.

FORECAST

A newly-made oil millionaire finally persuaded his blond secretary to swap a kiss for a diamond necklace and steak dinner, but just as he was collecting his share of the deal his wife popped in.

She took one look at the proceedings and called the obituary editor of the local newspaper. "My husband's dead. Tell your readers," she ordered grimly.

"How terrible," sympathized the editor. "When did he pass away?"

The wife said, "He starts tomorrow."

A Windy Tale

A man with a lung disorder visited a specialist. After a thorough examination the doctor said: "You are a musician, I think, and play a wind instrument."

"You're right," replied the patient.

"That explains everything," announced the doctor. "There's a definite straining of the lungs, and the larynx is inflamed as though by abnormal pressure. What instrument do you play?"

"The accordion," replied the man.

Thanks, Doc

Druggist: "I made a mistake on that prescription I gave your wife. I put in strychnine instead of quinine."

Husband: "Oh, then I owe you 20 cents more."

Preparation

Mushy: I want to buy this book, "Little Women." I have a friend who's getting married to a midget.

Flight

"I drove my car so fast it actually took off."

"You mean it went sailing through the air?"

"Yeah, I hit a bump and it flew to pieces."

BIG JOB

A Cleveland man stopped a newsboy in New York saying: "See here, son, I want to go to the Fifth National Bank. I'll give you a dollar if you direct me to it."

With a grin, the boy replied: "All right, come along," and he led the man to a building a half-block away.

The man paid the promised fee, remarking, however, "That was a dollar easily earned."

"Sure!" responded the lad. "But you mustn't forget that bank-directors is paid high in Noo Yawk."

The TV Age

Two bobby-soxers met on the way to school.

"Did you see the eclipse last night?"

"No. What channel was it on?"

Your Mistake

The college prom was filled to overflowing. A gallant junior said to a young lady, "Thanks for the dance."

"Dance? Dance?" she asked, puzzled. "I was just trying to push my way through the crowd to the punch bowl."

TRIPPED TONGUE

The bridegroom, who was in a horribly nervous condition, appealed to the clergyman in a loud whisper, at the close of the ceremony:

"Is it kistomary to cuss the bride?"

The clergyman replied:

"Not yet, but soon."

SELF RELIANT

Lady Voyager: "I wish to be directed to the Captain."

Sailor: "He's fo'ward, mad-am."

Lady Voyager: "Just take me to him, my good man. I'll decide his character for myself."

Silly Words

Hangover—The moaning after the night before.

Blunderbuss—A misdirected kiss.

Disc Jockey—A guy who lives on spins and needles.

Racetrack—Where the windows clean the people.

Mt. Everest is reported gaining height every year.

Ticklers

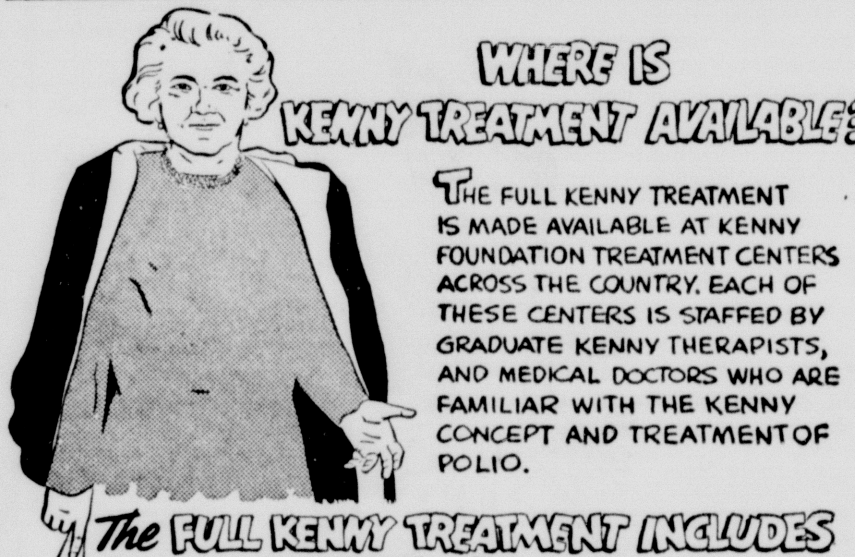

By George

"Joe's wife must have gone home to mother again."

POLIO FACTS

Rats Bring Typhus Fever In Texas States Dr. Cox

Typhus fever continues to make its appearance in various counties of Texas, says Dr. Geo. W. Cox, State Health Officer. Like typhoid fever, most cases appear during the summer and fall and all citizens are urged to help control the spread of typhus by assisting in exterminating rats.

"There is only one way in which Typhus can be controlled," Dr. Cox said, "and that is by, as nearly as possible, completely exterminating rats in the State, since fleas from infected rats transmit the disease to man. We can begin to visualize the extent of the needed extermination campaign when we realize that there is estimated to be 13,000,000 rats in Texas."

There has been some confusion concerning the type of Typhus Fever which is occurring in Texas, but Dr. Cox pointed out that this disease is entirely different from the old world type which has followed some of the armies in Europe. Ordinarily the kind of typhus which makes its appearance in this section of the country is not a fatal disease, although there has been a death rate of about 2 per cent from Typhus this year.

The poisoning and trapping of rats throughout the State will help to control the spread of this disease although these are temporary measures. In order to be permanently rid of rats they will have to be starved out, which means that buildings housing food supplies must be rat proofed.

It should also be remembered that rats cost the householder millions of dollars each year in the amount of food they either eat or spoil.

A West Texas tradition says that a horned frog can live a hundred years without food or water.

Firemen Rally in Blood Drive for Lynda Graham

Members of Canyon's volunteer fire department gathered Thursday night to make emergency blood donations for Lynda Graham. Lynda is in a Dallas hospital suffering from leukemia. Late last week her condition was reported as being critical.

Lynda is the daughter of Mr. and Mrs. C. C. Graham of 2003 5th Avenue.

Fire Chief Bill Sternberg said the blood was designated to be used by Lynda Graham. In the event that she does not use all of it the remainder is to be used by the Randall County Blood Bank. Approximately 31 pints were taken during the emergency drive.

Marine Training Taken in Summer By WTSC Student

Cpl. Charles R. Holt, son of Mr. and Mrs. C. R. Holt, has successfully completed the junior course of the Leathernecks Platoon Leaders Class at San Diego's Marines' West Coast Recruit Depot.

Holt, who is a sophomore at West Texas State College, and 325 other college students arrived at the base last June 19 for the six week summer training program. All of the students are aspiring to the Marine Corps Reserve Commission rank.

Subjects varied from drill and map reading to case study and leadership. The latter being taught by instructors whose leadership abilities were proven on World War II and Korean battlefields.

Cpl. Holt will report to Quantico, Va., in the summer between his college junior and senior year. During these times he will continue his training until he is qualified to accept his commission.

The officer training program, almost twenty years old, is open to college undergraduates like Holt. There is an age limit beginning at 17 and ending with 26. The boy must also be able to meet high physical requirements. By being a PLC Holt availed himself of a draft deferment until completion of his college work.

Correction

The News was in error last week in the story concerning Robert A. McKee. Mr. McKee attended and was graduated from the University of Mississippi instead of the Jackson Law School as stated by The News.

McKee is an Adjustor with the Southern Farm Bureau Casualty Insurance Company here. His area includes the entire Panhandle. He first came to Canyon on August 2. After returning to Lubbock for a few days, he came back to Canyon to make this his home. The date of his return was August 8.

AN HONORABLE ONE

Personnel Manager: "Hm, you say you were discharged from your last job?"

Applicant (meekly): "Yes sir." "Do you mind telling me why?" "Not at all; my enlistment was up in the Navy."

A vast air-base project in Greenland, involving hundreds of millions of taxpayer dollars, is beginning to be viewed with a fishy eye by some members of Congress who have had a chance to look at it.

Walter Reuther, CIO leader, is a key backstage leader of ADA (Americans for Democratic Action), which is getting a special role in Stevenson's campaign organization.

Wilson Wyatt, personal campaign manager for Stevenson, was promoter of prefabricated housing idea that provided one of the more resounding postwar blowups. Taxpayers picked up the bill to the tune of many millions of dollars.

THE CHURCH HAS BRANDED ME Says Cowboy

MEMBERSHIP IN A CHURCH IS JUST LIKE WEARING A BRAND TO SHOW WHOSE YOU ARE. I'M PROUD TO WEAR THE BRAND AND BE COUNTED FOR MY LORD.

Open thou mine eyes, that I may behold wondrous things out of thy law.

Just Between You, Me and . . . the Gatepost

(By Lawrence Hunnicutt)

Mitchell Jones, adolescent psychology teacher and dean of men at West Texas State College, recently said that he would like to see an essay on the possibilities of a man who drives fast teaching his son not to drive fast. That's a good subject and one that a ream of stuff could be written upon.

There is a possibility that a fast driver could teach his son not to drive fast. If the father has an open mind about fast driving and is prepared for his son to drive fast, the possibility that such an event will come to pass is lessened. In other words, if the father is not the dare-devil type of driver who drives fast merely for the sake of speed he may be successful in teaching his son to drive more slowly.

If the father takes the attitude that he is an exception and a superior driver it will stand as a challenge to the son. This would probably be one of the best ways in the world to make certain that the son will drive fast. The father can take the intrigue and challenge out of fast driving by showing the son that it's permissible under certain conditions. When this is done the cause for fast driving on the son's part is removed. This solves the problem because, "When the cause is removed the trouble is licked."

That is our thumb-nail sketch of the possibilities of a fast driving father teaching his son to drive slowly.

It was good to see G. W. Webb back at his desk in the sheriff's office again last week. He had been absent for approximately five weeks taking care of Mrs. Webb who has been ill. It is our hope that Mrs. Webb will continue to improve.

Those people who don't believe that Canyon is growing should make it a point to visit the City Hall. There's a map in the conference room which shows the locations of all the new buildings put up since January 1, 1951. The rate of growth is not a mushrooming boom but more of a steady building program.

Wanted: More blood donors for the emergency drive for the soldiers in Korea. This is the program that is being waged to get the Bloodmobile here next week. The drive is an Armed Forces function that is being carried out by the Red Cross.

Found: A reader who enjoys our Chirps of Wisdom Department. He is Dan Johnson, a teacher in the Borger School System. Dan's home is on Highway 87 between Canyon and Amarillo. He has some dog kennels and knows quite a bit about the canine breed. Anyone interested in dogs, especially bulldogs, would probably find a visit to Dan's kennels interesting.

Charlie Donnell came by Friday afternoon. He's a very busy man these days. The job at hand is to get the Drive-In Theatre prepared for shows to start early in September.

Now we approach that part of the column where many people may want to stop reading. Some may term it a necessary evil but we term it, chirps of wisdom.

Failures are divided into two classes—those who thought and never did, and those who did and never thought.

Conscience gets a lot of credit that belongs to cold feet.

A high pressure New York executive summoned an assistant and said, "Look, my wife's in the maternity ward, I wish you'd go down and walk the floor for me because I can't get away."

A man is rich when he has more money than his wife can spend. Monkeys have such a good time because there are so many of them. There are so many of them because they have such a good time.

Today's dime is a dollar with the taxes taken out.

"I'll see you," said our hero as he laid down four aces in a game of strip poker.

G. H. Hess Rites Held in Umbarger

Funeral services were conducted in Umbarger Saturday morning at 9 o'clock for George H. Hess. The services were conducted at St. Mary's Catholic Church under the direction of the Griggs-Warren Funeral Home.

Hess was born July 4, 1877, in Cleveland, Ohio. He was a musician by trade and the son of German parents. Although his home was in Umbarger, Hess was at the Walker Convalescent Home in Childress at the time of his death. He had been at the home about one year prior to his death. He had lived in Umbarger for a period of 30 years.

The deceased is survived by one brother, Bern Hess, of Bayetteville, Ark.; one sister-in-law, Frances Hess, of Umbarger, and a number of nieces and nephews.

Pall bearers were John Battenhorst, Lewis Wieck, Ed Evers, Clarence Beckman, Charles Beckman and W. P. Janssen.

Bob Mathias, of Tulare, Calif., won the Olympic decathlon for a second time, and in so doing shattered his own world record for this test of all-round athletic ability.

JUST TO BE SURE The first thing many a person will do on resurrection morning will be to look at his tombstone to see if his name is spelled correctly.

Why get spanked and yanked in a tractor seat designed for long-gone horse-plow days? Save your health!

It's like riding on deep-stacked goose feathers to operate your tractor on a Flow-Ting Hydraulic Tractor seat! Fits 95% of all farm tractors.

Flow-Ting is the only hydraulic seat that gives you vertical free-floating cushioning. No "feeter-totter" action—no "boat-rocking" side-sway. It's the only hydraulic seat you can instantly adjust to your weight, without tools . . . The

only one with super-safe 4-point suspension.

Flow-Ting "floats" you in health-saving comfort across rough ground and uneven tillage by combination spring hydraulic action. Safe, strong, long-lasting. Low in cost—easy to install. Tens of thousands in use. Come in and try Flow-Ting.

*Upholstered seat and tool boxes slightly extra.

See the roomy, portable under-seat tool boxes. Get a pair for your Flow-Ting today.
